THE REGENCY AUCTION
JANUARY 25 | THE LUXOR | LAS VEGAS

Dear Collector,

Happy New Year! We hope that the coming year will be happy, healthy, and prosperous, and will allow us time to enjoy our wonderful hobby.

Legend Rare Coin Auction is proud to offer our 25th Regency Auction, the official auction of the PCGS Members Only Show on January 25, 2018. This Regency Auction features 349 exceptional quality lots, coming from the Ipswich Collection and other important consignments. The Ipswich Collection is a very high end quality, nearly complete set of three cent silvers that is fresh to the market and each coin was hand selected by a very picky collector for grade, quality, and eye appeal. Following the Ipswich coins, we present U.S. coins in a wide range of series and price points, literally something for everyone. Mint State early types in Choice and Gem grades, superb quality 20th century key rarities, impressive monster toned Morgan dollars, and important gold coins are presented in the pages that follow.

TERMS AND CONDITIONS

This is a public auction, conducted in accordance with these Terms and Conditions of Sale, by Legend Rare Coin Auctions (hereinafter referred to as "LRCA"). By bidding on any lot offered by LRCA, the bidder indicates acceptance of the following Terms and Conditions of Sale. Bidders are to comply with the Terms and Conditions of Sale, posted on LegendAuctions.com, at the time of the auction in which they are participating.

BUYER'S PREMIUM

A 17.5% buyer's premium will be added to all successful bids, and is payable by the winning bidder as part of the total purchase cost.

SALES TAX

All sales are subject to applicable state and local taxes. Any lots that are picked up and/or delivered in the state of Pennsylvania are subject to applicable state and local taxes.

PAYMENT

All merchandise must be paid for within TEN (10) days of the date of sale. We reserve the right to cancel any unpaid order after that time and to ban the bidder from future sales. Credit cards (Visa, MasterCard and Discover) are accepted for auction payments up to \$2,500.00 per invoice. Invoices and/or balances over \$2,500.00 must be paid via personal or certified check, money order, or wired funds. Personal checks, money orders and cashier's checks may be held for up to 10 business days in order to allow time for them to clear appropriate banking channels. E-check payments available. Please call 732-935-1168 to set up your account.

Please email info@legendauctions.com for bank-wiring instructions and/or to provide numismatic references.

RETURN POLICY

All lots are sold "as is." Lots graded by PCGS, NGC or other third-party grading services, or any lot viewed by the buyer or anyone on buyer's behalf prior to the auction, may not be returned. This is not an approval sale. All sales of lots to the highest bidder are final. Bidders are strongly advised and encouraged to research any lots upon which they plan to bid, and to determine bids, based upon their own evaluation. Bidders assume all risks concerning and related to the grade, quality, appearance, condition, history and origin of any lot. Bidders

acknowledge that coin grading is not an exact science, that it can be subjective and inconsistent and that it is possible that two parties might assess or grade the same coin differently. LRCA makes every effort to accurately describe all items offered in its sales. All items will be available for preview prior to the auction.

SHIPPING

Shipping costs will be billed separately and are non-refundable. Items will usually ship within 5-10 business days after payment has been received and/or funds have cleared. Coins will be shipped via Fed Ex or USPS or transported via armored carrier.

The shipping charge includes fees for our third-party insurance coverage, as well as any costs incurred through the USPS or Federal Express. Any shipments made via armored carrier (Brinks, Dunbar, etc.) will be calculated and assessed at the time of shipment.

INTERNATIONAL SHIPPING

It is not possible for LRCA to ship to some countries. Please email questions to info@legendauctions.com. Payment for all international orders is required in US funds. Please contact julie@legendauctions.com for bank wiring instructions.

Customs requirements for each country are the responsibility of the buyer. All packages shipped outside of the United States will include the required customs declaration and full value of the invoice.

BIDS VIA TELEPHONE

An absentee bidder may also participate live, during the auction, via telephone. Requests for phone bidding must be received at least three days prior to the auction date. Please fill out our phone bidding request form online or call 732-935-1168 to request a call from one of our representatives during the live auction. LRCA cannot guarantee phone lines, but will make every effort to accommodate those who wish to participate via this method.

RIGHTS & RESPONSIBILITIES

The auctioneer will determine the highest bidder. The auctioneer, alone, has the right to reopen the bidding for an item, if deemed necessary. LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass

to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize,

accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

a. Coins and currency listed in this catalog graded by pcgs, ngc, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.

b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the

Buyer, time being of the essence.

c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.

d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.

e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.

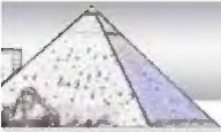

f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.

g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of LRCA authorized to do so.

h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors

warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions

by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey, and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale.

Auction participants expressly waive any right to trial by jury

PRINCIPALS

Laura Sperber
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

Julie Abrams
President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. Teletrade developed a unique coin trading method, utilizing state-of-the-art digitized voice board technology to run live auctions before the advent of the internet. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAL, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company. Her job responsibilities included continuing her role as CEO for Teletrade as well as marketing to buyers and consignors, with the goal of maintaining a balance between inventory and sales while growing the business.

In 2004 she joined Stacks-Bowers, an old world traditional auction house where she worked to expand their e-commerce presence, including the development of an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

Julie is a member of the American Numismatic Association, the Central States Numismatic Association and Florida United Numismatists.

THE IPSWICH COLLECTION

Legend Rare Coin Auctions is honored to have been chosen to sell the phenomenal quality Ipswich GEM MS 3CS Collection. We assure everyone it is one of the top sets ever assembled.

The collector has been passionate about 3CS pieces ever since he began collecting. Being a busy businessman, he had the means, and made the time to be able to attend shows and auctions to hand pick every coin with his trusted dealer. In several cases you can see the progression of him finding a better specimen. He knows the slight differences on every date. He was a stickler for both strong strikes and beautiful colors.

We really can't say enough about the coins in this collection. His favorite coin is the 1861 PCGS MS67 CAC. It has some of the wildest colors imaginable. He named it Sid Vicious. Pretty cool. He has other monster coins such as the 1859 PCGS MS66+ and the out of this world 1866 PCGS MS67+. His 1870 PCGS MS67 CAC (pop 2) is clearly one of the finest and rarest MS 3CS that exists. The majority of these coins can not be replicated.

All the painstaking hard work has been done for you over many years by the Ipswich Collector. He is sad to let go of his little family, but he has other bigger projects he has been working on (we hope one day to auction them). These coins represent a bonanza for MS 3CS collectors. Do not be fooled by the pops, true GEM superbly colored pieces like these are hard to get. The opportunity Ipswich Collections offers may not be repeated for years. Good luck!

THE IPSWICH COLLECTION

LOT 1

3CS 1851 FS 302, RPD. PCGS MS64 CAC

This is the finest FS-302 graded by PCGS, a repunched date variety where the engraver initially punched the date too low, then punched the logotype in the correct position. The misplaced digits can be seen quite boldly with a glass. Just a few trivial frost breaks/very light scuffs can be seen with a strong glass only. All of the details are sharply struck. The eye appeal is fantastic.

The only recent APR for a Mint State coin was an NGC MS61 that sold for \$581 in 2006—which more than proves the rarity of this variety. We cannot stress enough how cool this coin really is!

PCGS# 3664 | EST: \$750+

LOT 2

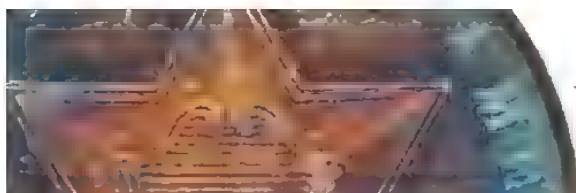

3CS 1851 FS 301, RPD. PCGS MS66 CAC

This is a VERY HIGH END GEM.

We marvel at how clean and satiny smooth the surfaces are. It's cool that with a strong glass you can even see traces of semi prooflike mirrors. A strong luster beams all over. Both sides enjoy a natural pale golden brown color. All of the details are exceptionally struck. The eye appeal is fantastic.

The second finest FS-301, bested only by a 66+. The repunching is seen most boldly on the 1. PCGS CoinFacts does not show any that have sold in auction, regardless of grade. A regular MS66 sells for \$1,300-\$1,500. Even if this wasn't special, we think it still should sell for more!

PCGS# 3664 | EST: \$1,500+

THE IPSWICH COLLECTION

LOT 3

3CS 1851 PCGS MS66 CAC

This is a really high end GEM. Just a slight hard to find touch of weakness (typical) is what keeps this coin from a MS67 designation.

Incredible surfaces are super satiny and have NO problems of any size, anywhere. A full unbroken glowing luster beams from all over. Both sides enjoy a natural silver/pewter coloration. All of the details are well struck and do stand out. The eye appeal is fabulous!

PCGS 136, NGC 74, CAC 62. The last one to sell in auction brought \$1,527.50 in April 2017. We expect this coin to enjoy strong bidding. The Ipswich Collector would not just allow old any 1851 in his set.

PCGS# 3664 | EST: \$1,500+

LOT 4

3CS 1851 O PCGS MS66 CAC

One look and you can see how seriously above average this coin is. It's amazing how this 167 year old piece has survived so pristine for so long.

Immaculate surfaces just make your eyes bulge in sheer joy. Even using a strong glass there are no issues to be found anywhere. For an O Mint 3CS, this coin has better luster than most we have seen (and we have seen the very finest). A totally original light coating of golden brown gently covers all of the surfaces. The details are well struck. The coin has wonderful eye appeal.

PCGS 30, NGC 13, CAC 19. The last one to sell in auction brought \$5,875 in June 2017. We expect spirited bidding on this premium quality piece. If it was good enough for Ipswich, it will be great for your set!

PCGS# 3665 | EST: \$5,000+

THE IPSWICH COLLECTION

LOT 5

3CS 1852 PCGS MS64 CAC

Housed in an OGH, the Ipswich Collector obtained this coin many years ago. It is evident how high his standards are by the fact you will find lesser quality coins in MS65 holders (we make no promise this coin will 65).

The surfaces are virtually perfect-even when using a strong glass. They also have a thick satiny texture. An above average luster beams from all over. The surfaces are totally original with a white base and a light gold color. The details are well struck and there some Mint made adjustment marks in the shield. Regardless, the eye appeal is much better then MS64!

PCGS 447, NGC 487, CAC 61 Throw out the ridiculous price guides on this coin. Good luck!

PCGS# 3666 | EST: \$450+

LOT 6

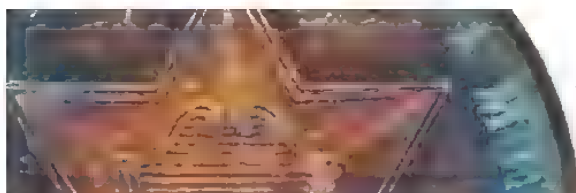

3CS 1852 PCGS MS66 CAC

Wicked neat! High end quality too!

Super clean and satiny smooth surfaces are all over. You can even see some neat die breaks with a strong loop. A moderate luster can be seen. Both sides have a moderate mix of pale olive/deeper pewter colors. This is not a dull or drab coin. All of the details stand out with full strikes. The eye appeal is great!

PCGS 115, NGC 87, CAC 37 The last one to sell in auction brought a stupid cheap \$1,118 in August 2017. Finding really nice examples of this date and grade are not so easy.

PCGS# 3666 | EST: \$1,000+

THE IPSWICH COLLECTION

LOT 7

3CS 1853 PCGS MS66 CAC

Premium quality all the way.

Beautiful surfaces are satiny smooth and are super clean. Using a strong glass all you will find are a few scattered die clashes-but NO problems. A strong luster illuminates both sides. Superb original toning of moderate gold on the obverse and golden brown on the reverse are spread evenly all over. All of the details are fully struck.

The eye appeal is superb!

PCGS 84, NGC 34, CAC 37. The last one to sell in auction brought \$1,880 in August 2017. This will be a wonderful addition to any GEM set!

PCGS# 3667 | EST: \$1,500+

LOT 8

3CS 1853 PCGS MS67+ CAC

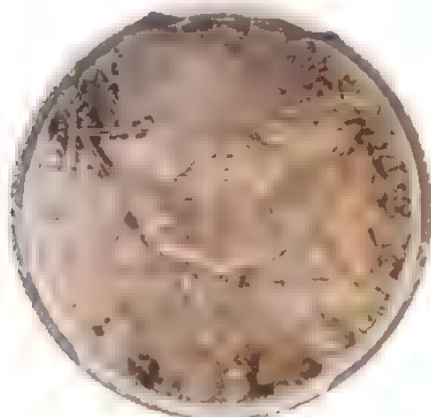

We have seen most of the high end MS67's. It is our opinion this coin is tied for the finest known. Even if you do not collect 3CS, you might want this coin in your Type set!

Absolutely flawless (and we mean **FLAWLESS**) surfaces really ARE that special. We looked over this coin many times with a strong glass and found NO flaws of any size, anywhere. A full booming luster (full for a 1853) beams from all over. A splash of deeper and totally original golden brown/russet/evergreen colors are on parts of both sides. The toning is not dark and is very pretty. Every detail is fully struck and does stand out. The eye appeal is phenomenal!

PCGS 9, NGC 10, CAC 10 PCGS has graded only 3 in MS67+. NONE have ever sold in auction. However, we can tell you in 2014 we placed one for \$10,000. These are so underrated in such high grades. This coin will be a star of ANY collection it resides in.

PCGS# 3667 | EST: \$7,500+

THE IPSWICH COLLECTION

LOT 9

3CS 1854 PCGS MS66+ CAC

Even though there are two finer (the MS68 is impounded in the #1 Simpson Collection Legend built), we fully rank this coin as one of the finest 1854's that exists! Perfect surfaces are simply amazing. We used a strong glass and looked multiple times for problems-and found none. We can't imagine how this coin lasted for 164 years in such a remarkable virtually untouched state of preservation. A booming luster can be seen from across the room. Outstanding totally original shades of moderate champagne/russet/gold/blue/pale green swirl all over. We do not see these so needle sharp in strike as this coin is. This is way superior to the majority of 1854's in GEM we have ever seen.

PCGS 11, NGC 4, CAC 11. Of course, this coin has never been sold in auction. PCGS has graded only this coin in MS66+ and one 67 and the lone MS68 (which sold for \$64,625 in 2014). We doubt you will be able to improve this coin and ever get a better one. This is pure top Ipswich quality that we believe will command a strong price! Good luck!

PCGS# 3670 | EST: \$7,500+

LOT 10

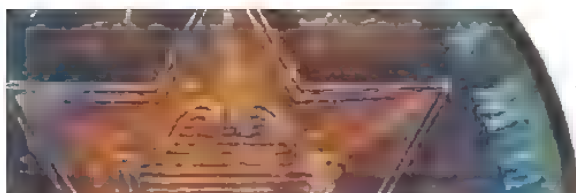

3CS 1858 PCGS MS66+ CAC

No question this coin came from the bank and was undisturbed for 160 years. It defies the mind how that can happen.

The surfaces are pretty much perfect. Even using a strong glass will yield no problems. A moderate luster can be seen. Both sides are evenly covered by a deeper mix of evergreen/purple/golden brown/russet original colors. Every detail is fully struck. The eye appeal is very pleasing!

PCGS 41, NGC 16, CAC 17. PCGS has only graded 4 coins in MS66+. The current Collectors Universe Value is \$6,500. The Ipswich collector did all the hard work for you

PCGS# 3674 | EST: \$5,500+

THE IPSWICH COLLECTION

LOT 11

3CS 1859 PCGS MS66+ CAC

We showed this coin to our sister company Legend Numismatics, as they have built the #1 set of Mint State and Proof 3CS pieces. They know these coins as well as anyone. They feel this coin is by far one of the prettiest 1859 MS pieces that exists. They told us they have never seen one with as much color. We agree! Super high-end quality is another plus here. Exquisite surfaces have a thick satiny texture and are super clean. A really strong luster illuminates both sides really boldly. Unbeatable colors of original blue (rims) and violet deep gold centers make the coin look like yet another masterpiece from mother nature. All of the details are frosty and are sharply struck. The eye appeal is they super!

PCGS 20, NGC 15, CAC 18. PCGS has graded only 3 coins in MS66+ with 5 in MS67. This coin is a unique double whammy of killer color and SUPER HIGH END quality. We expect not just 3CS collectors to pursue this coin. NO PCGS MS66+ has ever been sold via auction. The Collectors Universe value is a ridiculous \$2,750. Next step up (which this beast is very close too) is worth at least \$12,000. Good luck!

3CS 1860 PCGS MS65+ CAC

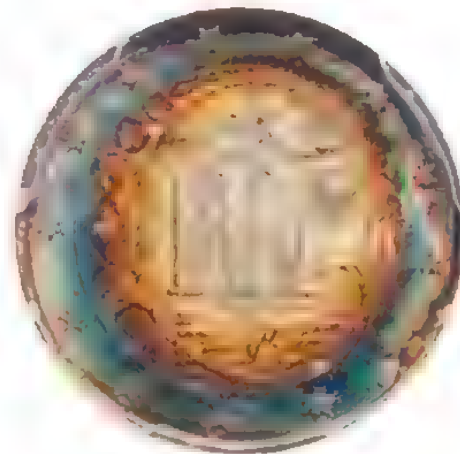

What a HIGH-END killer coin! There is an off the charts coolness factor here in that the obverse is prooflike.

Superior surfaces are exactly that. We used a strong glass, looked hard, looked all over and found no real imperfections. The reverse actually is semi-prooflike. We did see some super slight die polishing lines. A strong luster beams boldly from all over. Miss Liberty and the details are pinpoint sharp in strike and are boldly frosted. We clearly can see why the Ipswich collector chose this coin for his original piece. The eye appeal is gorgeous.

PCGS 26, NGC 21, CAC 9. PCGS has graded only this coin MS65+. This coin has never been sold via auction. We think the Collectors Universe Value is too cheap at \$1,900 since the last regular MS65 sold for \$2,520 in November 2017. This is a really wicked cool GEM Mint State 3CS.

Yet another small wonder that probably has sat somewhere undisturbed since it was minted 158 years ago.

Superb in every respect, this coin has no visible flaws. Extra thick satiny surfaces appear boldly. The luster is moderate and blends into the surfaces. A ring of totally original blue frames the rims and opens into deep golden brown centers. Every detail is razor sharp in strike. The eye appeal is excellent!

PCGS 16, NGC 4, CAC 11. The last PCGS piece like this to sell in auction brought \$4,700. We expect strong bidding here as after you see this SUPERB GEM, you will want to include in your collection-just like the Ipswich collector did.

This wild punk rocker of a coin is named Sid Viscous by the coin's owner. It is a SUPER HIGH END TONED beast that deserves that name! It is also the Ipswich collectors favorite coin in the set. We agree that it is a wild one! Totally glam surfaces are exceedingly clean and are satiny smooth. Even using a strong glass reveals nothing. A strong luster illuminates the dazzling colors. Spectacular shades of royal blue/violet/tangerine/purple swirl all over. On the reverse they form a bad to the bone circular pattern. Bet old Mother Nature is jealous! Every detail is pinpoint sharp in strike and stands out. The eye appeal will make your jaw drop and lock!

PCGS 31, NGC 30, CAC 14. PCGS has not graded any higher, we do suspect one day they will-and it will be this coin. PCGS showed this rockin' beast no mercy. The current Collector's Universe value is \$3,250. We could see this coin easily surpassing that and selling for "moon" money! Be prepared and good luck!

VERY picky is how we describe the Ipswich Collector. This coin clearly was carefully stored super lovingly for its entire 156 year existence.

High end surfaces are exceedingly clean and have a satiny texture. Only with a strong glass can you see the light die clashing. A full luster beams from all over. Both sides are an original white with highlights of pretty light gold. All of the details are very well struck. The eye appeal is superb!

This remarkable SUPERB GEM is one HIDDEN MICROSCOPIC scuff from being an MS67. We LOVE this co.n!

Overall, the surfaces are phenomenal. They do appear clean to the naked eye. Only using a strong glass can you find a super light scuff. The surfaces are that rare combination of semi satiny and semi prooflike mirrored. A bold glowing luster can be seen all over. A thicker ring of pale gold frames the obverse. A partial ring is on the reverse. The centers are a deep pewter/pale lavender color. This coin is totally original. Every detail is frosted and is fully struck.

You can clearly see the mirrors beam. This is one of the few times you do not need a strong glass to see the clash marks (Mint Made). A booming luster really can be seen from across the room. Both sides have a daring mix of totally original deep champagne/blue/russet colors. Every detail is needle sharp in strike and has thick frost. We really think this coin looks much better than its grade. The eye appeal is awesome.

WEALTH OF THE SOUTH PCGS MS65**

A GLORIOUS survivor of this important Civil War era token, no doubt one of the FINEST extant!

The obverse shows rice, tobacco, sugar, and cotton plants with the legend THE WEALTH OF THE SOUTH above. The reverse depicts the Palmetto tree with a cannon and munitions and a spray of rays and stars, with the southern "patriotic" motto NO SUBMISSION TO THE NORTH above, and the date 1860 below. Every detail is boldly impressed and fully struck up. The fields are distinctly prooflike and reflective with the typical icy blue/silvery-white/gray hue that GEM Mint State white metal tokens and medals often have. A very visually impressive example. We have been unable to locate another example in this composition, clearly a great numismatic relic of Southern pride and strength issued just before the dawning of the Civil War.

A simply fantastic example of one of the most beautifully designed world "crowns" from the 19th century! The Central American Republic consisted of what is today the nations of Costa Rica, Guatemala, and Honduras. This GEM, clearly among the absolute **FINEST** examples known was struck in Guatemala. A fully radiant sun rises over five mountains on the obverse, and the Ceiba Tree, dominates the central portion of the reverse. The motto **LIBRE CRESCA FECUNDO**, translates roughly to Grow Free and Fertile. KM-4.

This coin is **SUPERB** in every regard. Many examples of this type have crude, weak strikes, dull surfaces, and/or mottled unattractive tone, or are conserved in some way. Remarkably, this coin was struck with expert precision. Full definition of every detail, including the leaves on the reverse tree. A distinctive semi-reflective luster can be seen on both sides, really providing a wonderful "back light" to the details, making them stand out further and accenting the delicate old cabinet tone.

PCGS 1, NGC 0. This is the **FINEST** of the date graded at either service, and it would be hard to imagine a finer example out there! This is a real "trophy" coin for anyone building a GEM set of world crowns. One look at this GEM and you will certainly be smitten!

1/2C 1797 C-1. 1 ABOVE 1. PCGS MS66 BN CAC
EX MISSOURI CABINET COLLECTION

A REMARKABLE, STUNNING GEM! Everything about this coin is **IMPRESSIVE!** A bold cartwheel luster actually rolls along the obverse surfaces which are smooth and free of any problems. Indeed any little mark or fissure is from using a cut down Talbot Allum and Lee Cent as a planchet. Evidence of the undertype can be seen at the lower left obverse periphery and at ICA on the reverse. Rich brown surfaces show hints of a steely blue patina, which is quite attractive, especially when the light hits it. The obverse strike is about as full as you could hope to ever see on a 1797 half cent, while we note a touch of peripheral weakness on the reverse.

This coin is **AMAZING** to view in hand, just to contemplate the history behind it, and marvel at how, after nearly 220 years a **COPPER** coin can be so perfectly preserved, without any corrosion, carbon spots, or other issues that plague coins of this vintage.

The U.S. mint did not produce their own copper planchets at this time. Most copper stock was sent over from England, but in 1797, the mint purchased the remaining 1794 and 1795 cent tokens produced by the New York firm Talbot, Allum, and Lee. These were then cut down to the proper size and weight for half cents and struck into new coins. As mentioned, portions of the original coin is visible on this **SUPERBLY** preserved gem. Equally impressive is the fact that the provenance of this coin is traced back to the Edward Cogan May 1871 auction where it was plated as lot 878. It was then in the Virgil Brand Collection then part of the Brand Estate, sold to Burdette Johnson in 1935, went through the hands of various intermediaries until it was placed into The Tetterhorst Collection (Missouri Cabinet).

PCGS 1, NGC 0, CAC 1. This is among the absolute **FINEST** 1797 C-1 in existence. It is the highest graded as a BN, and only a single coin is graded as a 66 RB by PCGS (the Bushnell-Jackman-Foxfire-Pogue coin). The presently offered **GEM** is from an earlier die state than the RB Pogue coin and possesses a greater overall eye appeal, and it realized a much higher price, realizing \$299,000 in the February 2014 auction of the Missouri Cabinet. The Pogue coin sold at the absolute bottom of the market, February 2016, realizing only \$223,250. Now that the Pogue coin is put away again, this is the **ONLY GEM** example that will be available on the market for some time. If your area of interest is early half cents, this is a **MUST** have! Bid accordingly!

1/2C 1800 C-1. PCGS MS64 RB CAC
EX MISSOURI CABINET COLLECTION.

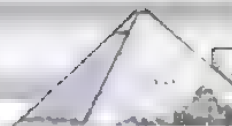

Amazing quality and eye appeal for an 1800 half cent! The faded Mint red is still quite evident and both sides are even and attractive with their faded Mint color with bluish steel brown. Free of any troubling specks or spots, the color is a wholesome delight. Furthermore the surfaces show only a few tiny nicks and handling marks, far fewer than one would expect for a half cent from this early era. A thin strikethrough line above the bust tip serves to identify this amazing coin. Middle die state, Manley state 3.0. There was a small hoard of these that came out for the 1980 ANA Convention, but this coin was not from that group as it was in the Col. E. H. R. Green holdings in the 1930s.

The quality of the planchets used to strike most 1800 half cents is high. The planchets were provided by Boulton & Watt, the famous English inventors and suppliers of planchets. Once struck most of the half cents were soon in circulation, so finding a Mint State coin, especially one with original Mint color is quite extraordinary. This particular one is pictured on the CoinFacts website with its extensive provenance noted as well.

Notably from Howard Rounds Newcomb and soon B. Max Mchl in 1935; to Col. E. H. R. Green Collection; appraised by F. C. C. Boyd in the Green Estate for \$5 on August 9, 1937; sold for \$4 in April 1943 to the Eric P. Newman and B.G. Johnson partnership; Eric P. Newman and his Education Foundation; Missouri Cabinet; Missouri Cabinet Collection Auction, Goldbergs, January, 2014, lot 49 at \$46,000.00

PCGS 3, NGC 0, CAC 2. None are graded finer but there are two reported as MS63 RD by PCGS. This is certainly well up in the Condition Census for the date and technically one of the finest to survive, especially so with this much residual Mint red remaining. What a marvelous near-GEM half cent! When rotated in the light, the frosty mint luster brings out ample amounts of original mint red color, steely blue, pale olive, and mahogany hues combined with an overall soft chocolate brown patina. Boldly struck, Liberty's hair details and drapery lines are fully defined. Likewise, the leaves on the reverse wreath are also fully rendered. The fields are completely smooth, free of any roughness that so often can be seen on these early half cents. While one of the most common 1804 varieties, this Cohen 10 is certainly close to the condition census.

PCGS 10, NGC 3, CAC 6. The famed Missouri Cabinet piece was a 64+ BN CAC that realized \$6,900 in January 2014 had a few more tiny ticks and lines (and a rather noticeable carbon fleck on the reverse). This coin is highly appealing and will excite anyone looking to add a near-GEM early half cent to a high end type set or collection of Half Cents. Liberty's hair curls and drapery folds, obverse dentils, and reverse wreath are all crisply struck, showing nearly full definition. A fully choice example of this important original Proof half cent. Sharply struck with bold definition throughout, and razor sharp details. Smooth, icy mirrors contrast nicely against the sharply defined details. Pleasing mahogany, emerald, olive, coppery-red, violet, and brown tones swirl together creating a wonderful look. Walter Breen wrote in his *Half Cent Encyclopedia*, that there are "at least sixteen known." PCGS Coin Facts suggests about 12 in the BN Designation and 6 in the RB Designation. In all, PCGS has graded 13 in all grades and designations.

PCGS 4, NGC 1. The most recent example to sell in auction brought \$11,750 in March 2017--the same as a PCGS PR63 BN that sold in June 2016. L1C 1793 WREATH VINE AND BARS. PCGS MS64+ BN CAC

A GEM early Large Cent. A magnificent survivor from the earliest days of federal coinage boasting an exceptional look. For a coin that was struck so long ago in 100% copper, the most reactive of the metals used to strike coins, it amazes us that any can survive so fine!

The brown copper surfaces are generally smooth and free of serious porosity, and none that comes from improper storage after striking. The color is a perfect milk chocolate hue that is even across the entire coin. This nicely struck S-9. By the time this coin was struck the dies had clashed and the reverse broke at the right with a pair of serious die cracks that run in parallel, one from R to the wreath and the other through the CA to the wreath. Other die cracks start at the lower left ribbons that curve up to UN. Light planchet roughness can be seen in areas on the reverse is natural to the issue, as the planchet stock for 1793 cents was poorly prepared.

A very pleasing, glossy mint luster is seen all over

We have plate matched this GEM to the Stack's Bowers January 2013 Rarities Night Auction, lot 13109, where in an old green PCGS holder, graded MS64 BN, and sold for \$152,750. This is the Sheldon Plate Coin and is ranked as tied for 8 or 9th finest on the EAC census and is earlier from a 1982 Quality Sales Corp auction, where it was sold to R. Tettenhorst. It is believed that Julian Leidman brokered a trade with Jim McGuigan for the 1808/7 half cent. (This cataloger would like to thank Gordon Wrubel of PCGS for his assistance in the pedigree information).

PCGS 11, NGC 5, CAC 6. This is the ONLY MS64+ graded, and PCGS lists 11 graded finer. LOT 36

L1C 1794 HEAD OF 1794. PCGS AU55

Generally smooth and very pleasing surfaces, devoid of the pitting or other problems that seem to plague early large cents. Soft violet-brown surfaces yield to some hints of original coppery-red that clings to some areas around Liberty's locks. Using a very powerful loupe we can locate a single spot that was removed, leaving a "bright spot" on the lower reverse, but overall this coin is problem free and very eye appealing. S-65. Rarity-1. A very nice piece that may be in the Condition Census for this variety, as Breen's EAC listing goes to EF45 (EAC standards are generally much more conservative than the PCGS or NGC standards). This was a prolific die pairing that kept striking until the dies fell apart. Breen lists 9 die states, this one being State around V and VI.

PCGS 56, NGC 20 The last AU55 Sheldon-65 to sell in auction was the CAC approved Tom Reynolds coin, that sold for \$15,863 in January 2016. Before that, a non-CAC example, with a few more marks than the present coin, sold for \$8,813. The current PCGS value is listed at \$10,500. This is a really pleasing example for a type or date set of large cents, and we anticipate more than a few interested EAC collectors will vie for this S-65.

L1C 1798 2ND HAIR STYLE. PCGS AU55

S-166. An R-1 variety that is easily identifiable by the large, arching die break on the reverse. Pleasing medium brown surfaces show some steel glossiness that brings out the nicely struck devices. The surfaces are smooth and free from any distracting marks or planchet issues.

PCGS 30, NGC 12. For a die marriage that is so prolific, we have only been able to trace a handful of AU55s going back to 2000! The most recent one sold for \$4,230 in a weak 2016 FUN auction--the one before that was in September 2006 selling for \$8,625. For all 2nd Hair Style varieties, the most recent PCGS AU55 was the Reynolds S 173, which sold for \$4,700 when reoffered in June 2017 and the CU value is \$5,150. Another wonderful near Condition Census example for any collector.

PCGS# 1434 | EST: \$4,000+

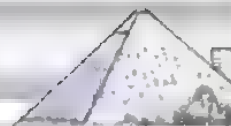

LOT 38

L1C 1808 PCGS AU55

A very late die state S-279. The advanced state of the dies has left the strike mushy and incomplete, especially on the obverse. Ample glossy mint frost remains on the surfaces accenting the subtle traces of rose, suggestions of the original mint color, and olive-brown patina. This is the first year of John Reich's Classic Head design, struck from 1808 to 1814 and represents the last type in the "early" large cent series, covered by Sheldon and Breen. Surprisingly these are very hard to find "nice," more so than the Draped Bust or Maroon Heads seen later.

PCGS 9, NGC 10. Of the S-279s that have come up in our APR database, none have the nice surfaces quality of the presently offered example, even with the weakness in strike. The last PCGS AU55 to sell in auction was an S-278 variety, and realized \$6,463 in the 2017 ANA auction. Anyone who collects first year types, this is a nice high grade example for your set. Good luck.

LOT 39

L1C 1810 S-284. NGC AU55 CAC EX COL. GREEN/NEWMAN

A wonderful and totally original high grade large cent that boasts a lovely eye appeal and pedigree. From the November 2014 sale of the Eric P. Newman Collection, where it was described in part as: "Dark chocolate brown patina covers the surfaces on both sides with a glossy sheen. Weak denticles at the upper right reverse and lower right obverse are the result of axial misalignment of the dies, a characteristic of Breen's late Die State II. Traces of minor encrustation are most obvious among the letters of ONE CENT and in isolated areas within the wreath. A bold strike reinforces the Choice AU motifs."

PCGS 15, NGC 8, CAC 6. This coin sold for \$4,994 in the above cited sale. A great coin like this deserves placement in a wonderful cabinet of large cents. If you are a collector of high grade, circulated large cents, you should certainly consider owning this coin!

LOT 40

L1C 1812 NGC AU55 CAC

Though not noted on the holder, this is a Large Date, S-289. Struck from a later die state with heavy die flow lines stretching details toward the rims. Typical for the variety, the strike is rather blunt, with some lack of definition in the centers. Also typical to the Classic Head type, the planchet is of a dark copper. Some original gloss is noted and the eye appeal is decent for the date.

PCGS 7, NGC 18. There are two designated properly as Large Date and 16 with no variety specified. CAC 4. This is the coin that sold for \$3,525 in October 2015. The current Collector's Universe value is listed at \$4,500. The Classic Head series is very difficult to find in nice condition, so we do expect strong bidding for this coin when it crosses the block.

LOT 41

L1C 1812 SMALL DATE S-290. NGC AU53 CAC EX NEWMAN

Another lovely Classic Head large cent from this group, and another that boasts the fabled Eric Newman pedigree. Nice hard surfaces are devoid of the porosity that usually plagues this series. The planchets were imported from England, and the reactive copper tended to be adversely affected by the sea air on the trans-Atlantic voyage. Nicely struck with full definition evident in Liberty's hair tresses. Evidence of die rust can be seen on the obverse and some micro-porosity is seen with a strong glass, not struck out when this coin was minted. It is clearly natural to the planchet and is not post mintage.

PCGS 6, NGC 2, CAC 1. In the Newman sale, this impressive AU coin sold for \$5,750 a record price for the grade indicative of its high end quality.

L1C 1814 CROSSLET 4. PCGS AU58 CAC

For a Classic Head cent in AU58, this example is a jewel! A brilliant mint frost remains, with accents of original mint color clinging to the protected areas of John Reich's design. Nicely struck throughout, and the fields are devoid of any planchet quality issues, that often plague this series

Only two die pairs were employed in 1814 to strike cents, each identifiable by the style of the 4 in the date, the Crosslet 4, as here, is the S-294. The Crosslet 4 is certainly scarcer than the Plain 4, S-295.

PCGS 27, NGC 4, CAC 4. The last time this coin sold in auction it realized \$7,638 in a March 2014 event. Before that, the Paul Gernie Coin sold for \$8,913 in February 2013. This coin will certainly see strong bidding when it crosses the block.

L1C 1814 PLAIN 4. NGC AU58 CAC

Ex Colonel E.H.R. Green and Eric P. Newman Collections, S-295. Walter Breen wrote in his Large Cent Encyclopedia, "Possibly the commonest of all early cents," in discussing this variety. That said, this coin is anything but common when it comes to eye appeal! It is amazing how much ORIGINAL mint color still clings to the outlines of the nicely struck up devices. The surfaces are clean and free from all but the most tiny ticks. A neat die state, where the dies have clashed, and the outline of the reverse wreath makes Liberty look like she has a bold double chin. An arching die crack connects the rim between the 18 and curves up along the lowest hair curl, finally crossing through the bottom of Star 11 to the rim. The rims began to crumble, leaving some details drawn out to the edge, especially on the reverse

PCGS 20, NGC 10, CAC 7. This coin sold for \$7,050 in the original November 2014 Eric Newman Collection sale. Since then, the only CAC-approved coin to sell was the PCGS example sold as part of the Glacier Rams Collection in our July 2017 Regency Auction that brought \$7,344. A great looking coin with an important pedigree, and one that will be a delight for any large cent collector to own

A very sharply struck S-295. A lively satiny mint luster is seen in the fields and the surfaces are nice and even chocolate brown with hints of olive, gold, and mahogany iridescent hues. The surfaces show no serious marks or ticks anywhere and the planchet is of exceptional quality without any flaws.

PCGS 20, NGC 10, CAC 7. This GEM AU sold for \$8,050 in the 2012 CSNS sale. The most recent example to sell was in our offering of the Glacier Rams Type Set in the July 2017 Regency Auction, that sold for \$7,344. This is an earlier die state than the Newman coin offered elsewhere in this sale. Another cool Classic Head for a type or date set. These generally do not come with such fine quality surfaces so, bid accordingly!

LOT 45

L1C 1814 CROSSLET 4. PCGS MS65+ BN CAC

This S-294, among the ABSOLUTE FINEST examples, is from the July 2015 sale of the Doug Kaselitz Collection. It brought the record price for the variety, realizing \$55,813. For the date and type, this wonderful GEM retains as much ORIGINAL cartwheel luster as you could ever imagine, especially for a coin with the BN designation. Accents of brick red blend with rich chocolate brown, violet, and tinges of olive and apricot/rose.

The devices are knife sharp on both sides, each of the details in the hair, face, stars, dimples, and wreath is very sharp and fully defined. The eye appeal is superb. The final issue of the "early" large cents, the second to last Sheldon-numbered die variety.

These Classic head large cents, designed by John Reich were rarely saved at time of issue, and most are lower grade. Even those graded Mint State do not display the type of lustrous surfaces that this one has.

PCGS 4, NGC 1, CAC 2. As mentioned above this coin realized a record for the issue \$55,183, graded as MS65 PCGS/CAC. This is the first time it is appearing in auction as a MS65+ BN. This issue is so tough to find in nice enough grade that it was missing from the D. Brent Pogue Collection. We are pleased to present this extremely important 1814 large cent; suited for any serious cabinet of early copper or any SUPERB type set.

We note a tiny mark or two that are visible under close inspection only. The eye appeal of this coin is VERY impressive and a bold beautiful large cent for the picky collector.

The Silly Head is represented by two die pairs, N-4 and N-9. The N-9 is considered slightly scarcer overall, in GEM grades, this is the only one in MS66 BN.

PCGS 9, NGC 8, CAC 7. These population figures represent both varieties of Silly Head, and there are only 2 finer. The most recent PCGS/CAC coin sold for \$14,688 in a March 2017 auction sale. This SUPERB example will be a very fine addition to any advanced cabinet of early copper.

Anyone who has followed our auctions knows that our principals are huge fans of high grade early copper, and they LOVE coins that are Ex Ted Naftzger!

This high Condition Census GEM N-1 retains a copious amount of original mint red that accents the otherwise mellowing hues of olive-brown. A wonderful glowing satin luster brings out the high end surface quality that show only the slightest of microscopic ticks that you need a strong loupe to find. This lovely coin, whose pedigree traces back to Milferd Bolender's February 1947 auction (lot 687) ranks very high in the various Censuses. Bill Noyes calls it tied for CC#1, while Bob Grellman ranks it CC#2 in the 2009 Naftzger sale. Ted Naftzger purchased this coin from the above mentioned Bolender Auction. Sold in the September 2009 Goldberg's Auction of the Naftzger Collection, lot 1141, where it was purchased by D. Brent Pogue. Sold in the fifth and final section of the Pogue Collection, March 2017, lot 5221. For the collector of GEM large cents, what a great provenance of Ted Naftzger-Brent Pogue!

PCGS 23, NGC 36, CAC 9. This GEM brought a record price for the grade in the Pogue sale, which speaks volumes to the quality of the coin! We expect strong bidding for this beauty again now. A great type coin or for a wonderful set of late date large cents!

When we saw this coin we were shocked at how much GEM Mint red it actually displays. A strong luster does make the totally original color stand out. Even using a strong glass will yield no imperfections. Every detail is sharply struck and does stand out. For sure, this is NOT your average ho-hum Flying Eagle cent—the eye appeal is terrific!

PCGS 260, NGC 227, CAC 52. The last one to sell in auction brought \$3,643 in July 2017. This one will bring more because of its very real quality and eye appeal. As we mentioned before, we never ever see them with this much Mint red.

We love this SUPERB GEM piece. It is way superior to the typical "low end or just made it" coins you will see. It excited us first look-then every look. Overall, the surfaces are clean and smooth. There are some light frost breaks on the left obverse. A booming headlight type ORIGINAL luster enhances the absolute GEM ORIGINAL Mint red color. There is one tiny well hidden toning dot to be found using a strong glass. All of the details are lightly frosted and sharply struck. We rarely see pieces graded right and with this kind of flash. The eye appeal is tremendous!

PCGS 60, NGC 56, CAC 16. PCGS has graded 7 coins MS66+. PCGS has graded only 2 coins higher with one selling for \$19,975 in 2013 (and it was a NON CAC). SUPERB in every sense! Bold, flashy mirrors beam with brilliant clarity. The original red color is unencumbered by any fading, mellowing, or toning of any kind--it is a wonderful medium orange-red copper color. Only with a strong loupe will you notice a few very tiny flecks, none of which are distracting to the naked eye. Sharply struck and frosted devices contrast nicely against the mirrors, creating the wonderful cameo contrast displayed on both sides.

PCGS 7, NGC 1, CAC 5. This is the ONLY PR66+ RD CAM certified by PCGS, with only 2 PR67 RD CAMs finer. There are no records for this coin having sold in any auction. Based on the available auction data, we feel the CU price of \$5,000 is too low, as a regular PCGS PR66 RD CAM sold in February 2016 for \$5,170 and a PCGS PR67 RD CAM sold nearly a decade ago for \$10,350.

We do note that, per our auction database, the only PR66+ RD CAM to sell in auction was the Teich Family Collection 1902 that sold in November 2011 for \$14,950. This coin will certainly see very serious bidding from advanced Indian cent collectors--be prepared, we would not be surprised if we saw a record realization today.

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

1C 1909 LINCOLN. PCGS PR66 RD CAC

A vibrant RED GEM example of the second Matte Proof Lincoln issue, after the VERY RARE 09 VDB. Rich variegated red satin shows off some very light mellow toning toward the periphery. A Very pretty and original example!

PCGS 42, NGC 8, CAC 2. We sold the most recent RD example for \$3,050 in our July 2017 Regency Auction, and the current PCGS Price Guide value is listed at \$3,600. A popular issue that will certainly be actively bid on.

This is a super example of a tougher Matte Proof Lincoln date.

Superb matte surfaces are undisturbed and appear smooth all over. A good luster does add to the totally original golden brown/pale brown/faded red colors. Only with a strong glass can you detect a few tiny toning dots on upper obverse. Lincoln and all of the details are sharply struck. The eye appeal is very bold!

PCGS 24, NGC 11, CAC 13. The last PCGS (NO CAC) piece to sell in auction brought \$4,935 in August 2017. Prior to that, these were bringing \$4,000-5,000 for a few years. The current PCGS Price Guide value is listed at \$3,750. This is yet another coin the market has forced "on sale"! We assure you, this is a terrific SUPERB GEM piece you can buy at a great price.

1C 1912 PCGS PR65+ RD CAC

WOW What a SUPERB HIGH END GEM RED 1912 with real life! This coin is something we rarely ever see.

Luscious matte surfaces are pretty much near perfect. Using a strong glass all you can find are some toning dots (NOT flecks). A surprising luster makes this coin visible from a decent distance. No question, this coin is totally original and has never been messed with. The color is a gorgeous full GEM Mint Red with a touch of gold. A few TONING dots are on the reverse. Lincoln and every detail are fully struck and of course the rims are thick and knife sharp. The eye appeal is tremendous.

PCGS 30, NGC 1, CAC 7. PCGS has graded only this coin PR65+ RD. They have graded 2 higher, one of which we sold for \$37,600 in our Regency Auction XVI in February 2016. ANY GEM RED HIGH END set will be a perfect home for this marvelous lively specimen. Opportunity does not just knock-it booms! We can anticipate near record bidding for this exciting GEM!

1C 1913 PCGS PR67 RB CAC

This spectacular GEM was LOVE at first-and every sight! We stand by the fact we think this is one of the nicest Matte Proof Lincolns we seen (and recently we had several monsters in our auction)! We know it is from a fresh deal.

Incredible surfaces are just that-incredible. They have a full thick Matte texture. There are ZERO imperfections of ANY size, ANY where. The obverse has a full blazing luster while the reverse clearly was sitting on felt for many years. No question this coin is 100% original. The obverse has GEM Mint Red/gold/and some violet by the rims. Speaking of rims, this coin has really thick rims which are typical for Matte Proofs. Lincoln and every detail is needle sharp in strike and really stands out.

PCGS 6, NGC 6, CAC 4. The last PCGS PR67 RB (NON CAC) to sell brought \$11,162 in August 2017. The current Collector's Universe value is listed at \$10,500, and we assure you the quality and eye appeal were nothing like this! If you seek a "gaga" look and insane quality, this coin is for you!

1C 1915 PCGS PR67 RB CAC

One of the FINEST 1915 Proof cents that exists, and certainly in terms of eye appeal, this MONSTER is off the charts!

The sandblast fields are exceptional and virtually flawless. Lincoln is sharply struck with all of the details finely impressed into the coin. The satin-like finish from the matte surfaces have a tremendous "glow" that really helps bring out all the wonderful hues in the totally original toning. Bright red accents blend with a lovely magenta, violet, and azure that cling toward the rims.

PCGS 4, NGC 2, CAC 4. There are NONE finer in the RB designation, and only 2 graded PR67 RD finer. Only two PR67 RB CACs have ever sold in auction, the most recent in our July 2017 Regency Auction XXII, where a less toned example sold for \$14,688; the one before that sold for \$14,100 in June 2016. This coin is superior to both in terms of eye appeal. Note the CU value is listed at \$18,000 and neither of the PR67 RDs have ever appeared in auction, making this one of the highest graded pieces that may hit the market in the near term. Do not let this opportunity pass you by! What a great coin to add to, or start a collection of Matte Proof cents!

We consider this coin to be a freak of nature. It is 90% GEM Mint red (RARE) but PCGS won't call it that.

We have never seen a 1916 1C Proof so crazy red. There is a faint hint of purple/pale brown mixed in the color. The matte surfaces are clearly visible. Only with a strong glass can you find a tiny toning dot or two. There are no real imperfections. The luster is surprisingly intense. Lincoln and every detail are fully struck. The eye appeal is crazy gorgeous!

PCGS 57, NGC 19, CAC 12. It is crazy that the last PCGS CAC PR65 RB to sell in auction was way back in 2011. That coin realized \$6,325 in April of that year. This coin could actually fit into a RED set. Seeing is believing. This coin is also fresh to the market.

As you all may know, our sister firm, Legend Numismatics, is extra picky with copper. We can tell you, they adore this coin's HIGH END SUPERB GEM Proof.

Deep mirrors beam from all over, offering extreme clarity, cleanliness, and of course a bold reflection. If you twirl the coin, the mirrors resemble a freshly made sheet of glass. Both sides are a GEM original Mint Red color. Only with a strong glass can you find a few pinpoint toning dots. Every detail is sharply struck and has light frost. To quote Legend Numismatics' George Huang, "this is the way these are supposed to look".

The eye appeal is beautiful!

ONLY 950 were minted. PCGS 14, NGC 6, CAC 4. The last 1872 PCGS PR66 RD CAC to sell in auction brought \$8,225 back in May 2012—and the same amount in our October auction. (this is NOT that coin). Prior to that, they traded for \$11,000–\$13,000 for many years. These have been unfairly spanked by the market. This is a series that you actually can build a complete set of for UNDER \$75,000 in PR65/66 RD. You should consider it with the prices being too cheap.

Dirty little secret: the principal of Legend just built herself a PR66 RB set --we really believe in these!

The final date of this odd denomination also happens to be a PROOF ONLY issue, VERY flashy mirrors beam from the fields. Both sides show lots of ORIGINAL mint red that blend in with stunning stripes of magenta/violet toning. This is a coin where the color designation does not do the coin justice—there really is not much brown anywhere to be seen! The fields are ice-smooth, and close inspection does not reveal a single mark and only the most insignificant of microscopic flecks are found with the aid of a strong glass.

The eye appeal is exceptional

Only 600 examples were struck. PCGS 10, NGC 9. None are graded finer in the BN designation at either service. The most recent example to sell in auction was a PCGS/CAC coin that sold for \$4,700 in June 2015. In this cataloger's opinion this coin has a better visual appeal with much more original mint red color. Tied for **SECOND FINEST** at PCGS, this **SUPERB GEM** displays a bold semi-reflective satin sheen that is essentially as brilliant today as the moment it fell from the dies. Even using a strong glass we can find **ZERO** imperfections, and the eye appeal is stupendous! It starts with the bold luster that just radiates from the central star and can be seen from across the room. The strike is about as sharp as can be expected for a mint state piece with every detail rendered. Aside from a light dusting of clear gold, the surfaces are a brilliant pearly silver. No distracting clashmarks or die lines are present. It is amazing to think that there is a coin graded finer.

From an original mintage of only 4,500 pieces. PCGS 2, NGC 1, CAC 2 Neither of the two PCGS graded examples have ever sold at auction. The only auction record for a MS67 is for an NGC coin sold for nearly \$16,000 in August 2013. The lowest mintage circulation strike Shield nickel, one of only approximately 100 examples believed to have survived from an original mintage of only 16,000.

Pleasing medium nickel gray with accents of tan this coin did see some time in commerce, before being saved for posterity. Some old "dirt" clings to areas, suggesting that this coin has not been cleaned or conserved and we note only a single hidden mark in the lower left portion of the shield, partially hidden by the design elements. This date has always been recognized as a rarity, and many collectors over the years have chosen to include a Proof example in their sets to maintain a uniform high grade look. However, for a set of circulated coins, a Proof would certainly look out of place!

This coin is the REAL deal. Everything about it is unquestionable SUPERB GEM BU. This coin has NO peers!

Remarkable surfaces are virtually perfect. They are satiny smooth all over. The luster is strong and you can even see faint hints of semi-prooflike mirrors. A completely original mix of beautiful lilac/rose/gold colors swirls all over. The colors are gorgeous and there are NO spots. Miss Liberty and the details are pinpoint sharp in strike.

The first San Francisco mint issue of the denomination, and one of the keys to the series, with a mintage of only 238,000. Well struck with a strong mint bloom. Light pastel iridescent tones really come to life when rotated in a light. Clean surfaces reveal only the slightest of ticks when closely scrutinized under a strong loupe. This piece is far superior to the typical softened lackluster way they come.

PCGS 36, NGC 11, CAC 3. A small group of this date was located and certified, but none of them stickered at CAC. This coin is in a slightly older generation PCGS holder. 5C 1896 PCGS PR66 CAM CAC

If all Proof Liberty Head nickels looked like this, the market values would be a lot higher! This coin is PERFECT for a type set. First the nickel surfaces have deep, clear mirrors that are ultra reflective. The sharply struck devices are frosted and fully formed, contrasting against the mirrors imparting a bold eye appeal. Adding to that is a dusting of totally original gold tone. The eye appeal is SUPERB!

PCGS 24, NGC 10, CAC 8. There are 4 coins graded higher. The last one to sell brought \$3,240 in a September 2017 auction. Keep in mind that a PR66+ CAM sold for \$7,050 in April 2014. We can see this marvelous SUPERB GEM sell for a very strong price!

5C 1913 TYPE 1. NGC MS67+ CAC

Brilliantly lustrous and sharply struck, this SUPERB GEM has exceptional eye appeal and technical quality. Lovely light patina is emblematic of its total originality.

PCGS 627, NGC 330, CAC 213. NGC has graded six coins in 67+ and 15 finer. The most recent NGC example was not CAC and sold for \$1,293. NGC/CAC coins have sold for as much as \$4,406. The current CU value is \$2,250. A great coin for any SUPERB set of Buffalo nickels, or specialized collection of first year of type set.

5C 1916 DOUBLE DIE OBVERSE. PCGS MS64 CAC

We are pleased to present this EXCEPTIONALLY RARE coin. This is one of the major rarities in the series, in consistent demand from collectors in all grades, from low-grade damaged examples to the AMAZING near-GEM we are proud to offer here. Legend Auctions has had the distinct privilege to sell the Forsythe Collection duplicate in our July 2013 Regency Auction IV for a strong \$253,000. There are perhaps around 200 examples known in all grades, most in the VF range; very few are in mint state. The presently offered coin is one of only 3 graded MS64 at PCGS, tied for FINEST graded. The clean, smooth surfaces have a moderate satin frost that really shows off the delicate original lavender, olive, tan, gold, and powder blue patina. The details are boldly struck and the doubling is exceptionally bold; you do not need a glass to see the doubled features. Overall, this example displays fantastic eye appeal. Even using a strong glass there are no flaws worthy of mention, and in the old days, this coin would have likely been cataloged as a GEM.

PCGS 3, NGC 6, CAC 2. NONE are finer! The most recent MS64 sold is the above mentioned Forsythe coin that sold for \$253,000 in July 2013; that was the first example to sell since April 2009. The record price for this date is \$276,000 for an NGC coin in April 2008. PCGS lists a value of \$250,000 and this coin will certainly sell for a strong price, perhaps even breaking a record in the process. This sale, has attracted the attention of all the Buffalo nickel specialists with the consignment of the Angel Dec's set, and we think they will stay to bid on this delicacy. The addition of this near-Gem to any set will automatically catapult you to near-Legendary status. Good luck and congratulations in advance to the winning bidder!

LOT 100

5C 1918/7-D PCGS MS65+ CAC

The **ULTIMATE** Buffalo nickel available to collectors! This is the second **FINEST** graded example of this **KEY** issue and a coin that will elevate any Registry Set of Buffalo nickels to legendary status!

A **GEM** in every sense of the term. The surfaces are essentially without flaw. A glowing satin frost brings out the vivid gold, peach, and lilac iridescent toning that is lightly dusted over the surfaces. The strike is remarkably sharp for the issue with full definition to the devices on both sides.

It was about 12 years after these were struck that the variety was discovered in 1930. Like the 1918/7 S quarter, this is one of the true overdates in the 20th century series, and highly coveted as such. Scarce in all grades and Rare in Mint State, it is **EXCESSIVELY RARE** in **GEM** grades, with only a single MS66 finer than the current MS65+.

PCGS 3, NGC 3, CAC 2. As said, this is the **SOLE** MS65+ and the only one finer is a PCGS MS66 that has not ever been offered publically. The most recent regular PCGS MS65 was a non-CAC that brought \$258,500; there is a record for that coin at \$350,750 when it sold in the August 2006 Bowers sale of the Richard Hennessy Collection. This coin is certainly closer to MS66 quality than to that MS65 and certainly worthy of a very strong bid. Since the MS66 is currently in very strong hands, it is likely that this is the **FINEST** that will be available for collectors. As such, you can disregard the PCGS Price Guide value of \$400,000! You cannot put a price on the importance of the opportunity this coin presents so bid accordingly!

PCGS# 3939 | EST: \$350,000+

LOT 101

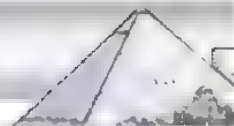

5C 1919-S NGC MS66

An incredible GEM, tied for FINEST graded at either services! A remarkably strong strike for the date, this coin is highly appealing for the advanced buffalo nickel collector. A full and vibrant satin luster does not yield to any scuffs or other distracting marks. Fully brilliant with only a light hint of blue and russet-gold tone on the obverse. As fine an example that any collector could hope to acquire for their advanced set.

PCGS 3, NGC 3. NGC has graded a single coin finer, graded MS66+. A major condition rarity in this conditionally challenging series. Most of the mint state coins are clustered at the MS63 and M64 levels, in MS65 the date is rare, and in 66 as here, virtually unobtainable! This coin sold previously in April 2008 for \$92,000, and more recently a PCGS graded coin sold for \$82,250 in November 2016! This is a major opportunity for the advanced Buffalo nickel collector and one that should not be overlooked!

LOT 102

5C 1923-S PCGS MS65+ CAC

Tied for **SECOND** finest certified by PCGS. This coin will certainly be a highlight in any advanced set of Buffalo nickels. A smooth satin glow on both sides is just the beginning of how to describe this GEM. The strike which is often soft, is bold, with nearly all details fully rendered. The surface quality truly stands up to close inspection with a strong glass, revealing no marks or flecks of any consequence.

PCGS 60, NGC 35, CAC 11. There are only **FOUR** MS65+s and three MS66. While the current CU value is listed at \$18,500, this impressive GEM is finer than your average 65+. A non-CAC MS66 sold for \$32,200 back in September 2013. If you are putting together a top notch set of Buffaloes and do not want to wait for one of the 66s to appear, you should really consider this beauty. Good luck, as this opportunity will not repeat itself again anytime soon!

PCGS# 3950 | EST: \$17,500+

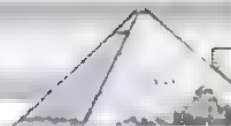

LOT 103

5C 1925-S PCGS MS65 CAC

One of the rarest dates in this series to find in Gem Mint State. First off, this date is often flatly struck, this is not the case with the presently offered coin. A satiny mint brilliance can be seen on both sides accenting the pastel iridescent hues of light blue, pale gold, and lovely nickel silver. A fantastic eye appeal arrests the viewer's gaze and easily one of the higher end MS65s of this conditionally RARE date.

PCGS 28, NGC 23 Only two are graded finer than the presently offered GEM at PCGS, a single MS65+ and a single MS66. The most recent PCGS MS65 CAC to cross the auction block realized \$21,150 in the 2017 ANA auction. In our Regency Auction XIX, the Angel Dee's non-CAC coin sold for \$24,675, and the current PCGS Price Guide value is listed at \$21,000. Clearly this wonderful GEM is as high a grade as any advanced student of Buffalo nickels could ever hope to add to their sets. Bid liberally if you want it!

TIED for FINEST GRADED! Clearly this coin has been kept safe from any possible damage since the moment it came off the dies and boasts a wonderful eye appeal. The luster booms from all over accentuating the well struck devices.

Except for some minor flatness on the Indian's hair, every detail is bold and chiseled! A clear, icy-powder blue and soft lilac and gold tone adds to this coin's SUPERB eye appeal.

PCGS 17, NGC 11, CAC 4. The Collector's Universe Price is \$6,000. This is the **ONLY CAC** approved example to ever sell in auction, bringing \$6,756 in our December 2016 Regency Auction. If you are building a top set of Buffalo nickels bid liberally for this moose.

PCGS 80-, NGC 44, CAC 24. Going back to 2011, there have only been eight CAC-approved examples that sold in auction, the most recent selling for \$2,233 in October 2016, and generally these have sold in the \$2,233 to \$2,990 range. The current Collector's Universe value is listed at \$2,750 and keep in mind a marginally finer MS65+ would cost about double, and any PCGS MS66 is a five figure coin.

For an AU55, this coin is very high end! Wonderful, totally original golden-peach patina starts at the rims and fades to a lighter hue in the centers. Nicely struck and displaying only a hint of friction on the high points, this is a very distinctly appealing example of this very popular variety!

PCGS 1119, NGC 802, CAC 111. The last CAC approved coin was graded by NGC and sold for \$1,175 in January 2017. We sold a PCGS/CAC example in December 2015 for \$1,234. This is one of the most famous of all U.S. coins, with even non collectors having heard of it, and this one is very nice!

What a marvelous PQ GEM 29 S nickel! Splendid munt bloom has a frosty glow in the fields around the nicely struck devices and shines on the well preserved surfaces, imparting a very high end visual appeal!

PCGS 248, NGC 58, CAC 39. There are 15 graded 66+ (no doubt counting some duplication), and the most recent example of this grade to sell in auction brought \$2,400 in a November 2017 auction sale, and was not CAC. Only 3 CAC approved examples have ever sold in auction. There are a mere 10 coins graded finer, all MS67s, and these would all be worth near \$10,000 or more! A great coin for any GEM set of Buffalo nickels!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 109

5C 1937-D 3 LEGGED. PCGS MS62 CAC

In the "good old days," before 3rd party grading, this coin would have been called Choice Brilliant Uncirculated. A bold frosty luster clings to the deeply struck areas of the devices and when viewed under a light, brings out the subtleties to the pastel color. The surfaces are generally devoid of any significant marks, and there is a solitary fleck that is worthy of mention on the reverse, otherwise the eye appeal is exceptional for the assigned grade. The origin of this very popular variety is the oft told story of a mint employee who over zealously touched up the dies with an emery board to remove clash marks.

PCGS 414, NGC 631, CAC 55. First off, we believe there is a lot of duplication in the grading service population reports. The most recent MS62 in PCGS/CAC sold in July 2016 for \$2,585 and the current PCGS value is listed at \$2,800. The present example is quite high end for the grade, and is nicer than some MS63s that we have been offered over the years, thus worthy of a premium bid.

5C 1913 TYPE 2. PCGS PR66

Lovely. The cataloger loves GEM Proof Buffalo nickels, and thinks that they make a great little collection, featuring just seven coins. The present Matte Proof Type 2 has a bold strike and great surface quality with light pastel iridescent hues. We think the only reason it does not have a CAC bean is a mint made planchet streak on the reverse.

PCGS 106, NGC 71. There really is a wide range of APRs for PCGS PR66s, mostly in the \$2,000-\$2,500 range and the current PCGS Price Guide value is \$3,000. This coin is quite nice overall and should see spirited bidding.

A wonder coin! Everything about this coin is amazing! The strike, the surfaces, the originality, the colors, the entire overall eye appeal! All the details on both sides are fully struck up, with beautiful iridescent shades of icy blue and creamy peach on both sides. Using a strong glass, there is not a single flaw to be found, anywhere! This coin is among the absolute finest of the date to be certified, and certainly one of the **FINEST** of all PCGS-certified Matte Proof Buffalos!

PCGS 3, NGC 3, CAC 3. There is a single 68+ finer. This stunning **SUPERB GEM** will be the crown in any Matte Proof Buffalo nickel set. We love everything about it, and it should bring a strong price. The only other CAC-approved example to ever sell in auction was in our September 2016 Regency Auction, selling for \$34,075. 5C 1936 SATIN. PCGS PR67 CAC

We are totally mesmerized by the high end look! Want an amazingly toned SUPERB GEM Proof nickel, and while we have handled higher graded examples, the presently offered coin is truly memorable! Rich golds and blues, blend with light orange, apricot, and pale rose accents. Needless to say the eye appeal is exceptional and the technical qualities are all there and then some!

PCGS 297, NGC 135, CAC 110. There really is a wide range of prices for these in auction, and we believe that the APRs and pricing guides for a coin like this may well prove useless to the toning aficionado. The Proof Buffalo nickel series is a short and totally do-able set, and this would be a great start, or addition to a high end set.

LOT 113

5C 1936 SATIN. PCGS PR68 CAC

Virtually PERFECT, indeed to call this coin a SUPERB GEM just seems inadequate to fully describe its wonderful quality

The devices on both sides are fully struck up and crisply rendered from an exacting blow from the dies. The satiny finish is uninterrupted by any post mint issue, indeed both sides are without flaw. Adding to the allure is a light dusting of icy blue and clear gold that gently adhere to the otherwise shimmering silver surfaces.

PCGS 43, NGC 31, CAC 15. The last one to sell in auction brought a very cheap \$7,932 in a July 2016 auction. Two sold in May 2016, one in our Regency Auction XVII for just shy of \$10,000 and one in another sale realizing \$14,100. There are only 3 finer, including 2 in 68+ and a single PR69. The last PR68+ sold in our September 2016 auction for \$13,513. A great coin for any collection, and Proof Buffalo nickels make for a very cool "side project" in between collections or while you wait for that very hard to find coin still missing from your main collection

A stunning and SUPERB example of this very popular issue. Bold, clean, and clear watery reflective fields beam on both sides bringing out all the subtleties of the rainbow toning. Exquisite rose, lilac, olive, and pale blue pastel iridescence that gently dust the surfaces. The eye appeal is spectacular.

PCGS 204, NGC 99, CAC 87. PCGS has graded 26 in PR67+, with a mere 8 graded higher. This is the most recent example in this lofty grade to sell in auction, selling for \$3,760 in the 2016 ANA auction. The current PCGS value is listed at \$4,750 and keep in mind that a 68 will cost well into the five figures if PCGS/CAC. This is a great coin bound for any special, hand selected set of Proof Buffalo nickels.

H10C 1795 PCGS MS66 CAC

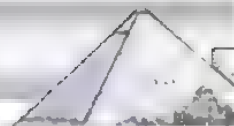

This magnificent SUPERB GEM is one of the highest graded and clearly one of the FINEST KNOWN.

The wonderful toning is the first thing that catches your eye. A wealth of deep rose and teal-blue hues cover the centers, with accents of gold and silver near the rims. Satiny mint frost on the obverse, the reverse's luster is distinctly reflective.

The devices are nicely struck with some of the eagle's breast feathers visible, which is not often the case on this issue. Even though the 1795 is the more common of this two year type, it is still exceptionally rare in such lofty grades. This coin's eye appeal is off the charts.

PCGS 9, NGC 7, CAC 7. This LM-8 sold in August 2015 for \$79,313. More recently, on sold in an April 2017 auction for \$76,375. PCGS currently lists a price of \$87,500 in the Collector's Universe Price Guide. There are five examples finer if you can believe it, 2 in 66+ and 3 in 67. The most recent MS67 to sell was the D. Brent Pogue coin that sold for \$176,250. Certainly a great coin for any advanced type collection! It may be a while until another SUPERB 1795 half dime comes up for sale again!

LOT 116

H10C 1796/5 PCGS MS64+ CAC EX ELIASBERG

Bordering on the GEM category, Legend Rare Coin Auctions is proud to have been consigned this beautiful early half dime that possesses perhaps the most famous provenance in all of American numismatics, Louis Eliasberg.

Exceptionally well struck with essentially full definition of all the details. Some mint made adjustment marks are noted for accuracy, and do not affect the appeal of this lovely jewel. The luster is somewhat reflective in nature, shining brightly from below the highly desirable Eliasberg color.

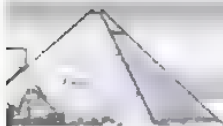

From the May 1996 sale of the Eliasberg Collection, lot 895. Earlier it was in the Clapp Collection, sold en bloc to Eliasberg in 1942. Earlier still ex E.S. Norris Collection, sold by S.H. and H. Chapman in May 1894.

This coin is a mini time capsule with a lot to tell us about the inner workings of the early days in first U.S. mint. We know that half dime coinage began in 1795, churning out coins dated both 1794 and 1795, both dates featuring the flowing hair design. In 1796, the silver coins (half dimes, dimes, quarters, half dollars, and silver dollars) all had the new draped or fillet bust types. The only type that transitioned to full output in 1795 of the new design was the silver dollar. The evidence of a 5 under the 6 in the date of this overdate variety reveals that draped bust coinage may have actually been planned for the latter part of 1795, for some unknown cause, abandoned until 1796. Perhaps it was the annual autumn outbreak of yellow fever.

PCGS 1, NGC 0, CAC 2. This coin is likely counted twice on the CAC report. This is the second finest example of this R-6 variety, and is highly desirable because of the quality and important pedigree. This coin last sold in October 2012 realizing nearly \$75,000. More recently the Parmalee-Garrett-Hayes-Pogue coin, graded MS66 by PCGS realized \$188,000 in May 2015. Only one coin is graded finer. If you are putting together a world class cabinet of early U.S. coins, this spells an important opportunity for you. Do not miss it!

PCGS# 4255 | EST: \$85,000+

LOT 117

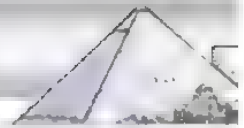

H10C 1797 NGC XF40 CAC

Housed in an old "Party" NGC holder, this early half dime really is **CHOICE**. Sharply struck devices on both sides are accentuated by a soft underlying luster that survives after 220 years and some light circulation. Rich slate-blue, gold, lilac, and tan color coat both sides and allow a couple of insignificant ticks from circulation to go unnoticed to the unaided eye. The eye appeal is stronger than many graded higher. Though not noted on the holder, this is a 15 Stars Obverse, LM-1.

PCGS 21, NGC 2, CAC 7. Overall nicer than the PCGS/CAC coin that sold in the 2017 ANA auction for \$5,993, the one that sold in November 2016 for \$6,756 and the NGC 45 that sold for \$7,050 in June 2014. Really high end for the grade and at a price point that makes this coin attractive for a multitude of buyers, we anticipate very strong bidding from half dime collectors, early type collectors, and those putting together (boxes of 20).

LOT 118

H10C 1800 LIBERTY. PCGS MS64 CAC

LM-3. The LIBERTY variety is one of the many interesting early issues that make coins from the first decades of federal US coins so interesting. The R punch was clearly broken at the loop, making it appear as a K. While about 150 examples are estimated in all grades, they are VERY RARE in any Mint State grade, especially so in such a lofty, near GEM grade.

A rich, antique apricot tone mingles with accents of lilac and gold, all brought to life by a glowing, underlying satin luster. The devices on both sides generally show crisp definition, with only minor weakness seen in places, but the details are fuller on this one than on most. The luster, strike, and totally original toning do come together to offer a beyond bold eye appeal.

PCGS 7, NGC 5, CAC 1. This is not only the only CAC-approved example, it is the ONLY one to appear in auction, selling twice since 2009, both time right around our low estimate of \$32,000. The current PCGS Price Guide value is listed at \$35,000. There are four coins finer at PCGS; a 65 sold back in 2008 for \$80,500 and the Pogue MS66 sold for \$152,750. With this coin's wonderful look and superb state of preservation, it is well suited for any amazing type set or specialized set of early half dimes--whatever type of collector buys it, they really will have a wonderful piece that will offer much pride of ownership.

This GORGEOUS, SUPERB GEM is an old friend, last sold in auction in our May 2016 Regency Auction XVII where it was described as:

"Some people think we describe everything as high end. That is because Legend Auctions and its sister company Legend Numismatics try to deal in the very BEST! We know this piece was actually re-submitted this for a +. PCGS can be so tough.

Absolutely flawless surfaces are really alive. Even with a microscope you would not find even a tiny imperfection. Semi prooflike mirrors are also visible. Of course there actually is a strong luster. Both sides are evenly covered by a very pretty and totally original mix of pewter/lavender (NOT dull)/golden brown/deep champagne/pale russet colors. Miss Liberty and the details are sharply struck and do stand out. The eye appeal is exceptional!

PCGS 10, NGC 16, CAC 15. This is the Gardner coin that sold for a mere \$11,250.00. That's the cheapest we know of any one selling in the past 5 years. This coin deserves a good long term home."

The current Population data is: PCGS 9, NGC 15, CAC 15. It was purchased by a collector who has now changed direction and has consigned it to us. In our Regency Auction, this SUPERB type coin sold for \$11,750 on an estimate of \$10,000-\$11,000. PCGS has graded only three coins finer; 2 in MS67+ and a single MS68+. The current PCGS Price Guide value is \$13,500, and there are APRs in excess of that level from a few years back. One look at this GEM and you will be in love, and we hope it ends up in a SUPERB type set.

H10C 1833 PCGS MS67

A wonderfully toned little jewel. Crisply struck throughout, the devices clearly stand out in full 3 D effect that stands out against the smooth fields. The devices also stand out beautifully against the alluring rich toning that leaves the central devices lighter than the peripheries. Shades of midnight blue, royal purple, and deep orange dominate. The eye appeal is excellent, indeed if it was not for a tiny tick in the center, this coin would have likely been awarded a CAC-bean.

PCGS 12, NGC 19. There is but a single coin graded finer at PCGS, a lone MS67+. Tied with the Pogue coin in grade, that coin did not have the boldness of tone as the presently offered SUPERB GEM, and it brought \$16,450 in May 2015. The current PCGS value is listed at \$13,500. A satiny lustrous SUPERB GEM example of this short lived type. Brilliant silver gleams from below a light blush of antique russet-gold-rose tone. Nicely struck throughout and exceptionally well struck. The Arrows at the date signify the change in weight prescribed in the Coinage Act of 1853 which lowered the weights of silver coins to get the silver to gold ratio back in balance.

PCGS 18, NGC 23, CAC 7. In MS66+, PCGS has graded 2 coins, and NGC 1. No PCGS MS66+ has ever sold in auction. The most recent MS66 graded by PCGS brought \$2,468 and was not CAC approved. A CAC approved PCGS coin sold in the May 2015 Gene Gardner sale for \$15,275. In 66+ Collector's Universe suggests a value of \$4,500. We will see what it's worth when the hammer falls. H10C 1857-O PCGS MS67 CAC

An amazing looking SUPERB GEM 57 O half dime!

Vibrant satiny luster swirls on exceptionally clean and smooth surfaces. The obverse has hints of golden-amber toning that helps provide contrast between the fully defined, crisply struck devices and the silky smooth surfaces. The reverse is more dramatically toned, with broad swaths of rich orange-amber tones. The eye appeal is truly exceptional, no wonder the late, great collector Gene Gardner chose this coin for his cabinet.

PCGS 4, NGC 5, CAC 4. This is the only PCGS MS67 sold at auction in this decade; prior to this one selling in our July 2017 Regency auction for \$7,344, it sold in the May 2015 Gardner auction for \$6,169, the last one sold in October 2006 for \$8,625. The current PCGS Price Guide value is listed at \$7,500 and keep in mind, if you are building a set of Seated half dimes, this is tied for second finest, behind the magnificent MS68. This is a great looking SUPERB gem and destined for a fine cabinet.

H10C 1862 PCGS MS67+ CAC

A condition census example, bested by only three coins all graded MS68. This coin's spectacular look is imparted by a combination of a bold frosty luster, superior striking quality, and a wonderful peripheral toning. Because of a small hoard that came out over the years, these are readily available in grades up to MS67, making them perfect for type set purposes. They also have the cache of being a Civil War issue.

PCGS 57, NGC 24, CAC 33. Only 10 coins are graded MS67+ and three are graded finer (all MS68). The last MS67+ to sell in auction brought \$3,995 in our July 2017 Regency auction. Keep in mind in December 2015, we sold the Simpson coin, a non-CAC MS68 for \$10,810. We think this coin should bring a price in line with the \$2,950 current PCGS Price Guide value. The quality and eye appeal are SUPERB and this is a great coin for any collection!

What a stunning SUPERB GEM! This coin is the second FINEST KNOWN 1866 (behind a PR67 DCAM).

Outstanding mirrors seem like those you would find on a proof Morgan, not a small Half Dime. The mirrors are super deep and do beam boldly from all over. The mirrors are also crystal clean, have extreme cleanliness, and are so highly reflective you pretty need sunglasses to view the coin with. A mellow but vibrant mix of original champagne/gold/pale reddish gold/blue colors swirl all over. Miss Liberty and every detail are so fully struck and are covered with such a thick frost they look like they were sculpted from a block of frosted ice. The eye appeal is powerful!

ONLY 725 were minted. PCGS 1, NGC 2, CAC 1. This coin has never sold in auction before. It is fresh to the market. There is a Collectors Universe Value of \$11,000 which is kind of a wonder to us since this lone coin has never traded. If you are building the ultimate GEM Proof Half Dime set, or just love top rarities, this coin is for you!

Bust dimes are always popular, and this JR-1 is a great collector grade piece. Light, problem free circulation. Areas of rich toning, but generally a light to medium silver-gray with accents of tan. Nicely defined, any mark was acquired naturally during the course of time spent in commerce and nothing affects the eye appeal.

PCGS 5, NGC 1. Only one XF40 has ever sold in auction, appearing twice, once in 2007 for \$2,530 and again in December 2015 for \$2,350. The CU value is \$3,400 and we think this coin will see strong bidding from collectors of early silver coins.

JR 3. This coin is very much comparable to any GEM. The surfaces are vividly perfect. Even using a strong glass you will not find even a pinpoint problem. They do have good original "skin" still showing. The luster is very good and it shows off the even original deep creamy white/pale pewter colors. Miss Liberty and the details are lightly frosted and have crisp standout strikes. The eye appeal is superb!

PCGS 26, NGC 33, CAC 15. This coin may be counted on the CAC Pop Report twice, as it was graded NGC MS64 CAC when it last sold in February 2015 for nearly \$5,000. For some reason this record does not appear in our auction database or in PCGS CoinFacts. Only 2 PCGS/CAC coins have appeared in auction, one selling in May 2013 for \$3,290 and the other in October 2012 for \$4,406. Regardless of what the other coins have brought, you can tell this near-gem is wonderfully original and eye appealing and should sell for a strong price.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

A VERY HIGH END GEM 1895-O

You rarely see 1895-Os as satiny and lustrous as this, which leads us to believe that this coin has been well protected from the day it left the Mint. The surfaces have no marks of any kind, and you can only see a few light frost breaks with a strong glass. An above average luster shows off original moderate golden brown/creamy white colors. The eye appeal is superb!

PCGS 3, NGC 1, CAC 4. We think the CAC population shows a duplicate in there. There is one PCGS MS66+. Legend Numismatics bought this coin in 2005 for \$41,400 and placed it directly into the Law Collection where it has resided until 2014. In 2014, this coin sold in our December 2015 sale for \$44,650. Due to the extreme rarity, the price guide values are not up to date on this piece. We expect strong bidding on this coin. Good luck!

First, this coin clearly ranks among the finest known for the date. Second, it's one of the best New Orleans coins you will EVER see! WOW!

The flawless surfaces are satiny, yet show traces of semi-prooflike mirrors, while a surprising, full booming luster shows off vibrant, original shades of blue/lilac/gold/pale forest green. Miss Liberty and the details are frosty and have sharp, stand out strikes. The eye appeal is superb!

PCGS 4, NGC 3, CAC 4. No PCGS CAC piece has ever been sold at auction and the last PCGS non-CAC piece that sold brought \$16,100 in the 2009 CSNS sale. Legend Numismatics bought and placed this magnificent coin in the Law Collection over a decade ago for more than \$25,000. We were mesmerized by this piece from across the floor. At first glance, you think it is a proof.

Deep mirrors beam vividly from all over. The reverse mirrors are more of a semi-prooflike type. You do not have to imagine the mirrors on the obverse for sure. The surfaces/mirrors have incredible cleanliness and clarity. Totally original shades of champagne/olive/blue swirl all over. This absolutely is NOT a dull or drab coin. Miss Liberty and every detail are thickly frosted and have stand out strikes. The eye appeal is crazy good!

PCGS 19, NGC 22, CAC 22. PCGS has graded only 2 MS67+ higher. The last PCGS CAC piece to sell brought \$4,800 in November 2017. We have offered a few really nice 92 MS67's-but none were fully PROOFlike like this. This piece in our opinion, is at the very top end of ALL PCGS MS67 1892's. It will be a superior addition to any GEM Type or Mint State Barber Dime set (or just put away in a box of 20 really near coins)!

10C 1916-D PCGS AU53 CAC

Superior eye appeal for the grade and date. The 1916-D is the undisputed key to the series, as only 264,000 were struck. Most mid to high grade circulated 16-D dimes are somewhat lack luster, from old cleanings or being clipped in the case of AUs. This one has a lovely patination over surfaces that saw just light problem free wear. This coin was very well struck before it entered into commerce and if it had not entered circulation, it would have likely been FB, as there is still good definition of the central band on the reverse. Compare this one to any AU53s out there, you will see how special this one really is!

PCGS 55, NGC 19, CAC 9. NO CAC-approved AU53 has ever sold in auction. Do not let the pops fool you, AU53s appear in auction about 1 time a year, going back 2000 (that includes both PCGS and NGC coins). This coin is exceptional and we would not be shocked if it brought a price close to the \$8,500 Collector's Universe value. A great coin for a carefully selected Mercury dime set.

A nicely preserved GEM with pearly hues over satiny brilliant silver surfaces. The design is generally nicely struck, save for the central band on the reverse. An interesting die break and flow lines in the fields on the reverse show how far into its life this die was when the present coin was struck. Light iridescent tone and attractive overall.

PCGS 21, NGC 11, CAC 8. The most recent PCGS/CAC example to sell in auction was in June 2017, realizing \$1,410; but examples have sold for more, including one in September 2015 for \$1,880 and one in January 2013 for \$2,820. The current PCGS Price Guide value is \$1,700. Only three are finer in this designation. Keep in mind that a MS66 with FB details will cost well into the mid five-figures. 10C 1921-D NGC MS67 FB

One of the **FINEST** examples known of this important **KEY** date! While a key date in all grades, it is also a major condition rarity! Boasting a brilliant, snow white luster, surfaces are exquisite and offer virtual perfection in preservation. Not even the tiniest ticks can be found to distract the eye, and the luster is full and fresh.

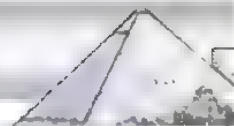

Mintages tailed off in 1921 as the economy in America slipped back a few notches adjusting from the war footing required for WWI, to the peacetime economy once again. Thus demand was curtailed for new coins in this period, and key dates were forthcoming in 1921. Only 1,080,000 were struck in the

Denver Mint, the second lowest of the series after the key 1916-D. However, the 1921-D coins entered circulation with little fanfare, as these were not the first of their kind like the 1916-D. Hence few were saved, and **GEMS** are sparse today. This is borne out in the Census of NGC and the Population

Report of PCGS -- there simply aren't many high grade survivors and the present coin is tied with just one other at this grade as the **FINEST KNOWN** of the date and mint. As such this sparkling 1921-D is destined for an advanced NGC Registry collection and will no doubt be one of the highlights of any advanced collection. A powerful and memorable example of this prized date and mint.

PCGS 1, NGC 2. None are finer. The only appearances at auction for a MS67 FB was in April 2011 where one realized \$24,150. This is an example of the finest caliber and worthy of a record bid from the most advanced of collectors!

What a coin! Looks like it has been carefully stored and never touched since the day it left the bank-92 years ago!

Sensational surfaces really do live up to that word. We used a strong glass and looked hard all over and found NO imperfections of any size, anywhere. The surfaces also have a thick satiny texture. A moderate luster (typical for the date) does glow from all over. Both sides are a totally original white with a splash of gold in the center of the reverse. You do not need a glass to see the full strike and full bands. The eye appeal is sweet.

PCGS 11, NGC 2, CAC 1. PCGS has graded only 2 coins higher-with only one beamed. The last PCGS CAC MS66FB to sell in auction brought \$21,850 in April 2012. Nearly 6 years is a very long time for none to surface. This coin was well worth the wait. Next step up would cost at least \$55,000-if you even could find one. This coin will make a great addition to any GEM Mercury Dime Collection!

A touch of toning graces the right obverse field. The eye appeal is very high end. It really is amazing to contemplate that so many SUPERB gems have been graded, considering that the Stock Market crashed in October, setting off the worst financial depression in history, and a dime had real value (consider the song "Brother, Can You Spare A Dime").

Housed in a first generation PCGS encapsulation, this really is a wonderful GEM example of this only "collectible" Carson City issue for the series.

Boldly lustrous with a vibrant satin sheen that rolls on both sides. The fields are smooth and free of any distracting marks. A wonderful dusting of iridescent toning in varying shades of sea and olive green blend to an icy blue and accents of gold. The eye appeal is well above what is normally encountered for the issue, and this one comes with the added cache of the 30+ year encapsulation.

PCGS 30, NGC 31, CAC 12. The most recent PCGS/CAC sold in the April 2015 CSNS auction, realizing \$16,450, only two others sold before that in August 2013 for \$17,625. The current Collector's

20C 1875-S PCGS MS66

An impressive GEM type coin! An incandescent luster in the fields shines through the light, but colorful toning that gives this intriguing coin its handsome look. Nicely struck, save for some light weakness in the central most portions of the design. The fields are smooth and lacking any marks of significance. The reverse is rotated about 45 degrees counter clockwise.

PCGS 68, NGC 55. As the "common" date in the series, the 75-S is often used to represent this short lived denomination in a type set. However, there is nothing common about this coin in 66 or finer grades. A non-CAC coin sold in June 2017 for \$5,405 and this coin certainly has more character. The current Collector's Universe price is listed at \$7,500 and this date is VERY RARE any finer, with only 12 coins graded higher. A great opportunity to add a premium grade GEM to your type set.

25C 1796 PCGS VG8

A very important, classic "blue chip" coin! This not only represents the first date of the denomination, but it is also a one year type, as the next year that saw a mintage of quarters, 1804, utilized the Heraldic Eagle reverse type. Only 6,146 examples were struck from two pairs of dies. The present coin is a B-2, the more common of the two, identifiable by the high placement of the 6 in the date.

While this coin saw extensive use in early American commerce, the definition is quite strong for the grade, and the surfaces display just a few ancient lines visible under high magnification. For a lower-grade piece, the eye appeal is quite nice. Housed in an Old Green Holder

PCGS 25, NGC 14. Going back to October 1998, our auction database shows 13 PCGS coins in VG8 having sold in auction and the average APR since 2006 has is \$16,422 and the current PCGS Price Guide value is \$17,000. This is coin that is always in demand, and will do nicely in a circulated type set.

A lovely B-1 with a great pedigree and even better eye appeal for the assigned grade. Only 64,080 quarters were struck, and most went into circulation. Mint State survivors are few and far between, as told by the grading service population reports. Rich, old fashioned envelope type toning imparted shades of rosy-pink toward the central devices, becoming deeper to a lilac/mauve/violet, then blending to a teal at the rims. A few ancient marks are noted, but are totally acceptable for the assigned grade.

25C 1834 PCGS MS65 CAC

The reduced size quarter type, 1831-1838 is often overlooked, as they do appear in Mint State with more frequency than their earlier, larger diameter predecessor. However, they are often lackluster, poorly struck, or otherwise unattractive. The presently offered B-4 is a distinct exception! A vibrant satiny luster glows, bringing out all the shades of cobalt and gold that for a lovely frame around both obverse and reverse. Every detail of William Kneass's "refined" design is crisply struck up and fully rendered by an exacting blow from the dies. The surfaces are clean, the glowing, lustrous surfaces do not show a single mark or scuff of significance, or anything that would mar the outstanding overall visual allure.

The early 1830s were a time of transition at the mint, with new presses being installed that would allow for coins to be struck with a close collar, which allowed for every coin to have a raised rim. The new technology required some changes to the design, as the new planchets were smaller than those struck in 1815-1828. As mentioned above, engraver William Kneass modified John Reich's classic Capped Bust design, and this type was struck from 1831 to 1838, when Christian Gobrecht's Liberty Seated design was adopted. This type is VERY RARE in GEM Mint State, and when offered there is very strong demand from type and date collectors.

PCGS 10, NGC 11, CAC 9. This outstanding GEM last appeared in auction in May 2016, where it sold for \$23,500. Prior to that, the coin had been in a collection for well over two decades, and is still housed in the Old Green Tag holder.

The Gardner coin, also PCGS/CAC with its somewhat dappled and streaky original toning, sold for \$24,675 in June 2014. The current PCGS Price Guide lists a value of \$27,500. Only 3 coins are listed finer at PCGS, including the MS65+

CAC that we recently sold for \$35,250 in our July 2017 Regency Auction, and the D. Brent Pogue MS66 that sold for \$58,750 in May 2015. This outstanding coin will certainly stand out in any type set or specialized collection of early quarters! What a great coin to just put away!

Billing, brilliant silver luster shines on both the obverse and reverse of this impeccable GEM. Completely untuned, this beauty looks as fresh today in 2017 as it did 140 years ago when it was struck. Boldly defined devices and the surfaces are free and clear of any majorly distracting marks.

PCGS 64, NGC 57, CAC 15. Only 5 are graded MS66+ at PCGS and none have sold in auction. An NGC MS66 CAC sold for \$3,055 in January 2017, in that same auction a PCGS MS66 sold for \$1,704. In the 2017 ANA auction a PCGS MS67 sold for \$4,230. The current PCGS value is \$3,250. A great type coin or example for any quarter set.

Clearly above average for an 1861. It is also totally original! The mirrors are deep, clear, clean, and offer strong reflection. A moderate crescent/circle of royal blue hugs the peripheries on both sides and opens into deep champagne centers. Miss Liberty and the details are frosty and have full strikes. The eye appeal is fantastic!

Only 1,000 were minted, but it is believed about half were melted due to poor sales. PCGS 6, NGC 15, CAC 4. Here is a startling fact: prior to this coin selling in our recent auction (yes Legend Numismatics bought it) the last one to sell in auction brought \$4,370 back in November 2005. PCGS has graded only 6 coins higher. Not an easy date to find in GEM Proof-12 years of none selling via auction is a lifetime.

What a sensational screaming SUPERB GEM!

Deep mirrors beam so boldly from all over you can see this coin from yards away. The mirrors have extreme clarity, cleanliness, and are of course highly reflective. When you twirl this coin the mirrors have a rolling silvery/watery look. Pretty neat. NOTE: there is a thin line on the HOLDER, NOT the coin. A very faint band of pale auburn frames the peripheries. Miss Liberty and the details are fully struck and have iridescent thick white frost. The eye appeal is jaw dropping!

ONLY 875 were minted. PCGS 8, NGC 6, CAC 6. PCGS has graded 2 in PR67+ Cameo and one PR68+. NO PR67+ Cameo has ever been sold via auction. The closest comparable is an NGC PR68 CAM that sold for \$8,813 in August 2016. As one of the FINEST extant, this SUPERB GEM will be a star in ANY collection! A coin like this just can NOT be replicated anymore.

The first year of the Barber series, and as such collectors saved a good number of GEMS at the time of issue. That said, few remained in SUPERB grades, and this date is quite scarce in this lofty grade. Brilliantly lustrous, and exceptional beautiful toning imparted from years of unmolested storage make this MS67 example a true prize for any type or Barber quarter collector. We can guarantee that if all MS67s looked like this, more people would collect the series!

PCGS 31, NGC 24, CAC 23 The current PCGS Price Guide is \$3,600, but CAC-beaned coins bring well in excess of that level, the most recent in April 2017 realizing \$4,230. This AMAZING GEM coin is from the superb Gene Gardner Collection, sold in October 2015, where it was described as follows. "Spectacularly toned in intermingled shades of electric-blue, violet, slate-gray, and reddish-orange, this simply gorgeous Registry Superb Gem is of equally high technical quality. The surfaces are smooth and pristine with luminous, softly frosted luster. The typical New Orleans strike seen here shows a touch of softness on the headband, shield, feathers, and fletchings, but does not diminish the appeal."

Here is an especially attractive GEM Proof 1901 quarter. Boldly struck and fully frosted reliefs offer a great contrast with the rich, reflective fields. The mirrors offer deep, bold clarity. The obverse is framed by a classic blend of cobalt and and amber gold, while the reverse takes those same hues all the way to the centers. VERY eye appealing and exceptional in terms of technical quality!

Only 813 Proofs were struck for collectors in 1901. PCGS 23, NGC 11, CAC 6. The last PCGS example sold in April 2013 for \$2,350 and was not CAC approved. The only CAC-approved record we can find in our database is from 2010, where one sold for \$3,738. In today's market, Barber coinage has been battered so badly that we really think that they present a great value. What does it take to get a Full Head designation? This coin is exceptionally well struck for this date that often comes very weak. A seductively lustrous coin has a vibrant brilliance that really catches your eyes as it traces over the bold devices. Light golden-peach coloration dances on the surfaces as the luster beams in the light. The reverse is a touch more subdued, but still offers a sharp brilliance and lovely coloration.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

A gorgeously toned, Condition Census O-119. A bold mint luster shines in the light and brings forth a stunning look imparted by the rich blue, teal, lavender, and violet toning. Generally well struck, better than usually seen on an example of this die marriage, which often shows very flat definition on Liberty's tresses and on the left wing of the eagle. The eye appeal is dramatic and unforgettable!

PCGS 9, NGC 7. The most recent examples sold cheaply earlier this year, one in each of the 2017 ANA auctions. Prior to those (which we think were actually buy backs), the most recent PCGS MS64 to sell in auction was this coin sold in ANR's July 2004 auction. That coin, the Eliasberg-Swan O-115, brought \$25,300. An O-119 in PCGS MS64 sold in March 2004 realizing \$24,150. More recently the Col. WOW, what a coin! We've seen a few of the MS65's, and can promise you this coin's quality is not too far away. Even if you are a super picky buyer, this coin will more than impress you! Plus, this coin oozes with originality. We fully call this coin an original GEM Half--and even if you are extremely selective, we think you will too!

Impeccable surfaces are super satiny and are smooth. We examined this beast with a strong glass and found not even tiny scratches or imperfections. Light wear on the high points, this coin possesses a great eye appeal for the grade. Boldly defined design elements and smooth fields do not show any significant signs of any sort of mishandling. Only a few stray marks from circulation are noted under strong magnification. A great example of the KEY date series to the Bust half dollar series. Only 47,150 half dollars were struck for the entire year, and they were actually delivered in January 1816; hours later the building where silver and gold planchets were rolled burned, accounting for the lack of coins struck in 1816. Only a single set of dies were used to strike 1815 half dollars, and all are of this 5/2 variety.

PCGS 67, NGC 31. The last non-CAC example realized \$7,931 in the 2016 ANA auction and the current PCGS Price Guide value is \$9,000. This is the KEY date to the series, always in demand from collectors!

PCGS# 6108 | EST: \$7,000+

LOT 183

50C 1817 PUNCTUATED DATE. PCGS AU50

O-103. A very nice example of this popular variety that presents very well. The surfaces show only light wear, and the marks commensurate with said circulation. Richly toned toward the peripheries, lighter at the centers. The dot that makes the date look as 181.7 is bold and this variety is very popular as this marriage shares the same reverse as the ultra rare 1817/4.

PCGS 13, NGC 4. The last AU50 graded by PCGS to sell in auction was in the 2011 FUN auction, realizing \$2,300. There are so many collectors working on "Red Book" sets today that more recently a PCGS XF45 CAC sold for \$1,998 in September 2016. The AU50 Collector's Universe value is listed at \$2,500. A great collector grade coin that will see very active bidding when it crosses the block!

PCGS# 6110 | EST: \$2,200+

LOT 184

50C 1820/19 SQUARE BASE 2. PCGS AU55 CAC

When you think of the term "original," an image of this coin should pop right into your mind's eye. Light, problem free friction on the highest points, there is still a nice amount of glowing residual mint frost that clings to the protected areas. The devices are boldly struck and show essentially full and crisp definition. Two different obverse dies were made into overdates, one with a Square 2 in the date (O 101), as here, and the Curl Base 2, O 102. The Square 2 is slightly less common.

PCGS 14, NGC 2, CAC 3. Only a single PCGS/CAC example has ever sold in auction, bringing a strong \$3,995 in September 2016 and in our opinion, the presently offered coin has a better look. Bound for a great "GEM" AU set of Bust halves and we expect strong bidding for this beauty.

PCGS# 6125 | EST: \$3,200+

LOT 185

50C 1833 PCGS MS66

A wonderful GEM that sits at the apex of the Condition Census for the O-107 die marriage. Colorfully toned at the peripheries with lovely shades of gold, blue, and olive. The central areas of both sides are a very pleasing, pearly silver with great frosty luster. Generally well struck, we note some typical weakness at the lower reverse design.

PCGS 1, NGC 6. The current PCGS value is listed at \$25,000. According to our Auction Prices database, the most recent PCGS MS66 example for the TYPE was an 1825 (of a more common variety) that brought \$21,150 in January 2017. A great coin for type or date purposes for the advanced collector!

PCGS# 6163 | EST: \$15,000+

LOT 186

50C 1835 PCGS MS62 CAC

O-101. A very attractively toned Capped Bust half dollar. Fully Mint State, if it were not for a few tiny scattered marks, this coin may have graded even higher. A frosty mint bloom brings the high quality strike and the bold coloration together, wrapping this into an original, eye appealing package.

PCGS 74, NGC 58, CAC 15. The last one to sell realized \$1,650 in an August 2017 auction sale. The current PCGS price is \$1,400. Worthy of a type set or date run of Capped Bust halves.

PCGS# 6168 | EST: \$1,200+

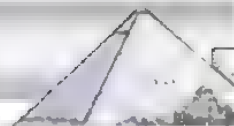

LOT 187

50C 1836 50/00, O 116. PCGS AU53 CAC

Another "naked" eye variety, where the die sinker erroneously punched the 0 in the denomination too far to the left and corrected it by punching the 5 over the errant 0. For the grade, this one is a GEM, with a bold luster that glows around the well struck devices and bringing the old envelope tone to life. Only light friction lines are noted for accuracy and you do need a glass to see them; otherwise the eye appeal is exceptional!

PCGS 11, NGC 5, CAC 2. No CAC-approved coins have ever sold in auction. The current PCGS value is listed at \$1,750. A very cool variety!

PCGS# 6170 | EST: \$1,100+

LOT 188

50C 1836 REEDED EDGE. PCGS MS64 CAC

Before the days of 3rd party certification, a coin like this easily would be called a GEM BU 65. We think it should be today as well. PCGS obviously sees something we don't. This is by far the prettiest 1836 Reeded Edge we have ever seen! We do rank it as one of the greatest coins Legend Rare Coin Auctions has had the pleasure of handling!

The surfaces are incredibly clean and smooth. Of course we went over both sides carefully with a strong glass and found nothing of any significance. There are traces of semi-prooflike mirrors. A strong luster vividly illuminates a sensational and totally original mix of vibrant olive/rose/gold/blue colors that are evenly spread all over. There are NO spots or discolorations. Miss Liberty and the details are sharply struck and do have light frost. The eye appeal is more than just jaw dropping! From an original mintage of only 1,200.

PCGS 6, NGC 4, CAC 3 (we think this coin is 2X). PCGS has graded only 2 coins higher. NO PCGS/CAC MS64 has ever sold in an auction. The printed estimates of value are all wrong-NONE have ever traded. If this GEM was to sell in the \$65,000 to \$75,000 range, it not be overvalued (in our opinion). NOTE: an NGC CAC piece (not this coin) sold for \$52,875 in the November 2013 sale of the Newman Collection. Not only is this coin a "must buy" for any Bust Half set, its a "must buy" for any GEM Type Collection as well. We assure you, the outstanding quality and eye appeal this coin offers is unrivaled for an 1836 Reeded Edge Half!

LOT 189

50C 1838 REEDED EDGE. PCGS MS64 CAC

An exceptional PQ and high end 1838 half dollar! We looked this near miss GEM over really hard. It is just one very old light scratch from full MS65 status. The surfaces are thick satiny texture and reveal only a few light frost breaks. A good luster enhances the totally original colors. Both sides are a mix of reddish gold/golden brown/pale purple/deep champagne colors. The colors are pretty and are NOT dull or drab. Miss Liberty and the details are fully struck and really stand out. The eye appeal is great!

PCGS 66, NGC 69, CAC 21. This near-GEM sold for \$6,300 the last time it appeared in auction, a testament to the high end quality. Keep in mind that a 65 would cost somewhere in the \$15,000 range if you could even find one! A great type coin or example for a set!

50C 1875 PCGS MS64 CAC

Very choice and original, this Seated half has a nice pearly-satin luster that comes out nicely under a dusting of iridescent toning. Displaying a typical strike, with some minor weakness in areas, the overall look is quite good. Clearly a coin that sat unmolested in an old envelope for a good long while.

PCGS 57, NGC 55, CAC 7. The most recent PCGS/CAC example sold in March 2017 for \$1,528 and the current PCGS value is \$1,400. With its pleasing, original look, we think this coin will satisfy most type collectors.

PCGS# 6349 | EST: \$1,200+

LOT 191

50C 1860 NGC PR67 CAM

A superlative and glorious GEM that ranks among the FINEST certified examples. This is a no questions asked SUPERB coin with deep mirrors that beam from all angles. Very smooth fields have the feel of a freshly polished sheer of ice, the reflectivity is unmarred by any serious marks or lines. The dies were highly polished before striking, which account for the numerous microscopic lines in the fields, as well as some tiny lint marks. A dusting of clear amber-gold graces the obverse, deepening toward the rim. The reverse takes that amber patina, and adds a band of deep blue and moderate violet hues, really framing that side with a wonderfully toned look. The sharply impressed devices are frosty and set against the depth of the reflective mirrored fields, the contrast is excellent

Only 1,000 were minted, PCGS 2, NGC 4. None are finer at NGC within the CAMEO designation, and only a single PCGS PR67+ CAM is finer in the designation. The most recent example to sell was in the FUN 2013 auction, where a different example sold for \$23,500. Since then, a CAC-approved, non-CAMEO NGC PR67 sold for \$29,375. This lovely coin will be well suited for any set of SUPERB Proof type or a specialized collection of Proof Seated Liberty halves. Good luck!

50C 1863 PCGS PR66

Among the highest graded 1863 Proof half dollars! Bold shimmering, watery mirrors shine through a later of golden, amber, violet, and olive hues. In a light, the colors "float" on the mirrors the way oil floats in a puddle. Even with the aid of a strong glass, only the most minute, microscopic lines can be seen. The strike is boldly defined with crisply impressed details fully rendered and razor sharp.

Only 460 proofs were struck during this turning point year in the Civil War. PCGS 3, NGC 3. The last one to sell realized \$7,638 in October 2015 and the PCGS Price Guide value is \$8,750. None are graded numerically finer, although PCGS has graded 2 in PR66 CAM. A similarly toned example brought \$11,750 in November 2012 and darkly toned NGC PR67 sold for \$14,100 in January 2013, and we think that might be more in line value-wise for this SUPERB coin.

PCGS# 6417 | EST: \$7,000+

LOT 193

50C 1899 PCGS MS66+ CAC

Technically this coin is an unquestionable MS66.9+. We think due to some slightly irregular toning PCGS would not grade it MS67 (we make no promise it ever will). Clearly, this coin sat undisturbed for the majority of its 118 years of existence.

Superior surfaces are extremely clean and have a thick satiny texture. Even using a strong glass yields not even any microscopic surprises. The luster is thick, satiny and unbroken. You can clearly see where the coin was lying on felt or cloth by the colors on the reverse. Those totally original colors include: moderate olive/reddish gold/gold/pale blue and swirl all over. The obverse has a pale deep champagne/pewter color. Miss Liberty and the detail stand out with crisp sharp strikes. The eye appeal is excellent!

PCGS 12, NGC 8, CAC 4. PCGS has graded 2 in MS66+ and 1 MS67, one MS67+. The last PCGS CAC MS67 to sell brought \$19,975 in August 2015. As we all know, the market spanked these coins really hard. You won't find a better time to build a GEM Mint State Barber set!

A totally original GEM! The surfaces on this original gem are extraordinarily clean and smooth. Even the dreaded right field has no issues. A decent luster shows off original deep golden brown tissue paper toning that frames the devices. Miss Liberty and the details are sharply struck and stand out nicely. The eye appeal has an old fashioned look.

PCGS 236, NGC 162, CAC 60. The last several examples sold in the \$2,200 to \$2,350 range and the current PCGS Price Guide value is listed at \$2,750. With this coin's great eye appeal, we think it could sell for a very strong price!

LOT 195

50C 1918 PCGS MS65+ CAC

Legend Auctions is pleased to offer this impressive and very important GEM early Walker in this sale. It is TIED for second finest graded at PCGS and it is not hard to see why. To start, the technical quality is all there. A bold luster glows all over. The fields surrounding the very sharply struck devices are devoid of any serious lines, marks, or discolorations. Both sides are awash in a delicate lavender-rose and silver-gray patina that is totally original, likely imparted from benign neglect in an ancient paper envelope for a long time. The eye appeal is high end and quite fetching.

PCGS 138, NGC 112, CAC 36. Only 5 examples have been graded MS65+ at PCGS, 3 at NGC, and there are a mere 9 coins graded MS66 finer at PCGS. Only a single 65+ has ever sold in auction, bringing \$8,813 in the 2017 CSNS auction. A PCGS/CAC MS66 sold for \$17,625 in the 2016 ANA sale, so the small difference in grade does account for a large difference in price, making this GEM seem like a great value. The current CU value is \$8,500. A great coin for any high ranked Registry Set.

LOT 196

50C 1921 PCGS MS65

A true GEM example of this important KEY Walking Liberty half dollar issue. A bold and swirling mint luster graces both sides accentuating the impressively struck devices. Ms. Liberty is fully struck up, a powerful blow from the dies bringing out all the tiny details in the the design. A blush of clear gold can be seen in areas toward the rims on the obverse. Close examination does reveal a few tiny ticks, but nothing that distracts from the GEM eye appeal displayed on both sides.

After the First World War, the US economy went into a very serious recession, and coins dated 1921 in general are considered scarce to rare in their respective series (except Morgan dollars).

The Philadelphia produced 246,000 halves this year, the vast majority of which quickly entered into circulation. The typical survivor is well worn, and GEMS like this are truly very rare.

PCGS 52, NGC 33. The most recent PCGS MS65 to sell in auction was CAC, selling for \$30,550 in our July 2017 Regency Auction. The current PCGS value is listed at \$22,500 and

we really think this Old Green Tag holdered coin is above average in terms of quality and eye appeal. Fresh to the market, consigned to this auction by a long time customer of Legend Numismatics, this coin has not been in any auction that we can trace. Good luck!

Speaking of the strike—it is about as full as you could hope for with full lines in flag and you can even see Liberty's thumb. A great example and it is not a shock to see why it is among the finest graded.

PCGS 352, NGC 307, CAC 158. NGC has graded 4 in MS67+ and only six finer. The last CAC approved MS67+ to sell in auction was PCGS graded and sold for \$2,115 in January 2017; the only NGC-graded 67+ to sell was NOT CAC and realized \$1,645. A great coin for any set of Walkers.

\$1 1846 PCGS MS64+ CAC

VERY HIGH END! Easily worthy of its + designation, 1846'S are famous for not being the prettiest date. This one certainly is an exception to that rule!

Unusually lively surfaces have traces of light semi-prooflike mirrors. Overall, the surfaces look totally defect free. Only with a strong glass will you find a few scattered ticks or two. A strong luster coupled with reflective surfaces really enhances the totally original toning. Both sides have shades of rich (but not dark) olive/gold/deep champagne/pale blue colors that blend together nicely all over. Miss Liberty and the details are frosty and have crisp full strikes. The eye appeal is excellent!

PCGS 22, NGC 21, CAC 5. PCGS may have graded only 4 in MS64+, and only 3 coins are graded higher at PCGS. This coin sold in auction \$28,200 in December 2016. We had another one that recently sold in our July 2017 Regency Auction offering of the 1994 Collection (which sold for \$30,550. If you could find a PCGS CAC MS65, one would easily set you back \$90,000+. Keep in mind, the last MS65 to sell brought \$97,750 and that was back in 2005! A choice set in MS63/64 of Philadelphia Mint Seated Dollars would make an interesting project. This coin would be a great addition.

Superb and high end. This is not one of the dull lifeless "chimney" hoard coins discovered in the early 60s. We really DO very much like it! Of course being the sole contributors to the FINEST Mint State SET of Seated Dollars EVER, we know how these come better than anyone!

This coin more than impressed us. The surfaces are really nice. Only with a strong glass can you detect a few scattered light lines and a tick or two. A strong luster illuminates the surfaces. Totally original colors of deep silver/pale gold swirl all over. Miss Liberty and the details are sharply struck, standout, and have light frost. The eye appeal is wonderful!

PCGS 27, NGC 24, CAC 11. PCGS has graded only 9 higher (of which just 3 are CAC). The last PCGS CAC piece to sell in auction brought \$9,988 in June 2017. Keep in mind, next step up (if you could ever find one) would cost at least \$60,000! Again, this piece is way superior to the typical dull and crusty way we have seen so many of these.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 209

\$1 1852 ORIGINAL. PCGS PR65 CAC

Legend Rare Coin Auctions is proud to offer the **FINEST** certified 1852 Proof dollar, Original or Restrike. Everything about this coin is incredible: quality, eye appeal, and rarity! A real trophy for any advanced collector!

The technical qualities are **SUPERB**! Starting with the mirrors, which are fully and deeply reflective with a stunning watery appearance beam from all over with seductive clarity. The fields are ultra-clean, the only disturbances that can be found are mint made lint marks from the polishing of the dies. Rich, totally original toning imparts a fantastic eye appeal. Deep blue hues dominate the obverse, ranging from a pale icy hue to teal to cobalt. The reverse features a beautiful and classic look, with sultry amber-gold in the centers, yielding to aqua-blue at the rims. The strike is full and complete, even in the centers which can sometimes come soft. One look at this **GEM** and you can see why we have had trouble putting it down!

There is very little documentary evidence as to how many original Proofs were coined in 1852. PCGS CoinFacts estimates a mintage of **THREE**. There is a lot of confusion regarding the designations, however the CoinFacts census includes this coin at the top, followed by the Col. Brock -- J.P. Morgan Collection coin that was donated to the American Numismatic Society in 1908 and the Mickley-Windsor (?) coin (both were parts of complete 1852 proof sets). Confusing the matter more is that Breen and Bowers have identified as many as six **DIFFERENT** reverse dies that were used to strike Proof 1852 dollars, Originals and Restrikes. Further research is certainly needed to sort this mess out. We know that based on the new reference by Dick Osburn and Brian Cushing that this die marriage, OC-P1 is the "correct" die pair for Original Strikes.

PCGS 1, NGC 0, CAC 1. If you are working on a cabinet of rarities, or need a Proof 1852 for your Proof dollar set, this is a coin for you. Since it is likely **UNIQUE** in private hands, you can pretty much toss out the price guides and auction records. One of the rarest silver dollar issues and a coin that really is undervalued due to its confusing nature. As more information regarding these enigmatic Original and Restrike proofs comes out in the research done by Osburn and Cushing and a new magnum opus on Proofs that will be published in the coming years, our understanding of the rarity and importance of this coin will be better, increasing demand. Good luck.

Hello GORGEOUS! If you need just one Trade dollar for a GEM type set, take a good look at the presently offered 77-S! Our partner, Bruce Morelan, with the exclusive assistance of our sister firm, Legend Numismatics, has built the #1 all time set of Trade dollars, so there we know how this series comes, and we can say, without hesitation that is this one of the FINEST 1877-S we have seen.

The first thing that catches the viewer's gaze is the blazing cartwheel mint luster, that swirls like on an 80-S Morgan dollar. The bands of radiance rolls smoothly, uninterrupted by any breaks in the frost, or any thing but the most trivial of contact. Both sides possess a dappled, totally original blend of burnt orange, aqua, and olive slate patina that mixed with the vibrancy of the mint brilliance, really have an unparalleled vivacity. All the details were crisply embossed into the planchet by a precision and exacting blow from the dies. All together, you really cannot beat the SUPERB, high end eye appeal that this coin has!

PCGS 6, NGC 6. No CAC-approved PCGS coin has ever sold in auction. The most recent MS66s brought \$15,275--one was a non-CAC PCGS coin and the other was the CAC-approved Col. Green/Newman NGC coin (both sold in the 2017 FUN auction. This coin did bring \$20,700 in April 2009, and is more eye appealing than the PCGS MS66 that is ex Eliasberg that sold for that same amount in January 2009. In terms of eye appeal, you will not see any other that has such an impressive look, and should see very strong bidding. The current PCGS value is listed at \$23,500 and to see a realization close to that would not be surprising. Only 2 coins are finer at PCGS, neither of which has ever sold in auction.

Here is a wonderful borderline GEM Proof Trade Dollar. The quality for sure is **HIGH END!**

Deep and glittering mirrors beam from all over. They also have strong clarity, remarkable cleanliness, and of course bold reflectivity. They actually look like a freshly made sheet of glass. A natural, vibrant, and moderate coating of pale reddish golden brown mixes with silver colors. There is one tiny toning dot at 4:00

or so on the obverse. Miss Liberty and the details are sharply struck and have thick frost. The eye appeal is tremendous!

PCGS 25, NGC 16, CAC 4. Do NOT be fooled by the pops. This is a very scarce coin. In April 2015 one sold at auction for \$3,995. The current Collectors Universe Value is \$4,750. Even more common dates, like 1880, in PR64 CAM (pop 158) are selling for around \$4,000 \$4,500. We can't stress enough what a fantastic value this coin represents. Even though they are scarce, this is a set you can complete in PR64/65, Cameo and non Cameo.

An exceptional GEM example with totally original surfaces that present wonderfully. Tan-silver patina dominate with accents of coppery-olive iridescent hues that blend with light aqua blue tones depending on the angle that the light hits the ultra reflective watery mirrors. The sharply struck devices have a rich frost that provides impressive contrast against the beaming mirrors. Even intense study with a strong glass reveals nothing that negatively affects the eye appeal of this beautiful GEM.

The 1877, with only 510 Proofs struck, has the lowest mintage of all regular issue Proof Trade dollars, 1873-1883, obviously the 1884 and 1885 have lower mintages, but are not generally considered "regular" issues.

PCGS 5, NGC 3, CAC 3. This coin represents the last two auction appearances of the date. Before selling in the 2017 FUN auction, it brought \$20,125 in March 2012. Another example sold in August 2011 for \$16,100. The current PCGS Price Guide value is \$17,500 and only four coins are graded finer, PR67+ CAM finest. WOW WEE MAUI! This coin a killer rainbow GEM toner.

Had this GEM been around when the Northern Lights Collection was being put together, it would have been totally worthy of inclusion in that world class cabinet!

To start, the coin is of SUPER high-end quality. The surfaces are nearly fully prooflike on the obverse. Plus, the surfaces are amazingly clean. Mother nature unleashed an incredible display of rainbow colors. The obverse is 3/4 covered by a gorgeous original burlap bag toned colors of emerald green/violet/gold/blue. The reverse is original white w/gold highlights by the rims. We do rank the colors a FULL 10 on our 1-10 color scale (10 is the best). Technically, we actually think PCGS held this coin back. We really do not see why in the end it is not an MS67+. The surfaces are pretty much perfect and the colors--well to say they are of Northern Lights caliber.... The obverse has a swirling mix of knockout neon like original shades of pearl green/gold/violet/blue that blaze all over. We do rank the colors a full 9 on our 1-10 color scale (10 is the best). First, the technical quality is all there and then some. There are NO scrapes or anything unsightly under the colors. The toning is out of this world! Original canvas bag colors (you can clearly see the textile texture). Stripes of mega monster pearl green/violet/royal blue/amber cover the entire obverse. The reverse is original white with gold rim highlights. The color pattern will weaken even the jaded toned Morgan buyer's legs! Absolutely this coin is of Northern Lights caliber. OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

Not only is this one of the finest 1887-S Morgan's extant, it is clearly one of the wildest toned 1887-S too! We never ever see this date with real toning like this.

We believe only a hidden tick or two is why this coin did not MS67. Using a strong glass, we looked over this coin really hard. There are NO problems to be found anywhere. The surfaces are not only beaming with luster, they are semi-prooflike. Mother nature really put on a display on the obverse. Moderate colors of olive/magenta/gold/blue/green swirl together in a whimsical pattern. Miss Liberty and the details are frosty and are well struck. The eye appeal is fantastic!

This date is extremely rare with REAL color like this. Legend has only ever handled 3 1893-CC's in their career with real and pretty toning like this.

First off, the quality of this piece is VERY high end-- even using a strong glass you will find few (and only minor) imperfections/ticks. The surfaces are really clean and smooth. A full booming luster enhances the electric toning. While only partial, this is real burlap bag dot toning. This is truly a spectacular DMPL Morgan. Exceptional black and white cameo-like contrast between the blazing reflective fields and essentially snow white cheek. The surfaces are generally very clean. The strike is razor sharp for the issue, with all of Ms. Liberty's hair details, eagle's feathers fully and crisply struck up. We do note two parallel lines that blend in with Liberty's lower hair curls that are mint made. We have had some discussion whether it is die grease or planchet slag, but either way it is part of the manufacturing process and does not affect the grade. A very low population, in 66 DMPL, and there are none graded higher. When consigned to Regency Auction XXII (July 2017), our consignor said that this coin was fresh to the market, and we have not been able to locate this specimen in any recent auction. This is the current PCGS CoinFacts plate coin.

What an engaging high end Proof Morgan! The grade could not be more spot on. Super deep mirrors beam forcefully from all over. The mirrors exhibit bold clarity, are super clean, and are so reflective you almost need Ray Bans on view the coin. You don't even have to twirl the coin to see the stunning "liquid mercury" like rolling of the mirrors. There is some light original golden brown toning around the rims and are some faint gold toning in the centers. This coin does have a silvery black and white cameo appearance. Miss Liberty and the details are thickly frosted and are fully struck.

ONLY 500 were minted PCGS 5, NGC 4, CAC 7. We are highly suspect this coin has been in a few times seeking a PR65 designation. Examples of the 8 TF in PR64 and higher have so few auction appearances at all since 2004. Finding a PCGS CAC piece-impossible! In fact, the last PR64 Cameo (no +) Legend Numismatics sold, was in 2015 for \$15,000 from a long time dealer who was buying it for his personal collection. Likewise, the eagle's plumage is sharply struck. The devices on both sides show off exceptionally lovely white frostiness that really does contrast nicely against the deep, chrome like reflection of the fields. The eye appeal, as expected for the lofty grade, unimproveable and **SUPERB** in every way!

Only 590 proofs were struck. PCGS 1, NGC 2. **NONE ARE GRADED FINER** at PCGS! Nothing finer than PR66 in the DCAM designation graded by PCGS has ever sold in auction. This beaming SUPERB GEM captivates from across the room, the mirrors luring you in like the siren's song.

Ms. Liberty and the details are fully and crisply rendered with fully frosted reliefs. Sitting against the deep, clear mirrors both sides show stunning CAMEO contrast. The mirrors are very smooth reflecting like a freshly cut piece of glass. You can twirl the coin in the light just be mesmerized by the flash. Close study of the surfaces with a glass yields a single hairline, and to the naked eye, this coin is FLAWLESS SUPERB in every way!

PCGS 3, NGC 16, CAC 4. There are four coins finer. The last example to sell in auction realized \$22,335 in a June 2017 auction. We sold that same one in December 2015 for \$27,025. Before that, one sold in August 2013 for \$32,900. The current PCGS Price Guide is \$19,500 and keep in mind that we just sold a 68 CAM for \$34,075 in our July 2017 auction. A great coin for any Proof Morgan collector and we can see this beauty selling for a very strong bid.

This is one of the finest TONED survivors for the date we have ever seen! We'll name this coin "Pride of Ownership". The collector who consigned this coin has let it be well known to us this piece was one of his all time forever favorite coins. He calls the mirrors "completely dreamy". We call the coin VERY HIGH END and pretty darn neat!

The "dreamy" and deep mirrors do beam boldly from all over and they have amazing clarity, are impeccably clean, and offer a SUPERIOR intense reflectivity. A serious mix of totally original colors so beautiful they would keep any Peacock in heat, blush-swirl all over. Deeper shades of olive, forest green, violet plum, golden amber, and blue green just capture the light in a spectacular way. If you twirl the coin, the mirrors have that "dreamy" watery look. Miss Liberty and the details are frosty and are fully struck. The eye appeal is super!

Only 735 were minted, PCGS 4, NGC 9, CAC 1. PCGS has graded only this coin (pop 1) in PR67+ with just 2 in PR68. This coin has NEVER appeared in any auction-nor has any PR67! The last PR68 sold back in 1999 in auction. NON Cameo-gorgeous toners like this simply do not exist. We assure the next owner, they will enjoy the same "pride of ownership" the last collector did.

Ex Jack Lee. No question this piece ranks among the finest known for the date. 1902 does not come looking as smooth or cameo like a 1880!

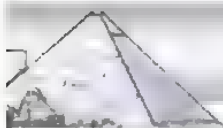

This coin has extremely deep mirrors which boom (not just beam from) all over. The mirrors are ultimate in cleanliness, clarity, and have a bold reflection. You don't even have to twirl this coin to see rolling liquid mercury look. A mellow but lively mix of original pale golden brown champagne colors swirl in patches all over. This coin has so much life you really need sunglasses to view it with. Miss Liberty and the details are needle sharp in strike are full fully struck. They also have a delicate silvery frost (note 1902 1904 are silver proofs that are very rare in cameo). The eye appeal is like the quality—amazing!

ONLY 777 minted. PCGS 5, NGC 11, CAC 5. This is the ONLY PR67+ graded. PCGS has graded only 2 PR68's only one is CAC. It is EX Jack Lee as a NGC PR68. This absolutely is one of the very best ever 1902 Proofs you will see. Think about this, 30 + years of grading and there are only 8 possible coins graded PR67 or finer. Good luck finding a better 1902

We unhesitatingly pronounce this to be a VERY rare and grossly UNDER valued date in PR67 and higher. Don't expect to find a better one any time soon. Good luck!

\$1 1928-S NGC MS66

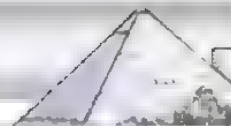

TIED for FINEST graded for the date with a single PCGS coin. The satiny luster shines over smooth, problem free surfaces, that show a rich layer of deeper pastel iridescent toning. The obverse is draped in a luxurious lilac, gold, rose, and olive toning that is smooth and even. The reverse has the same rich hues but with some deeper tones at the lower rim. The strike is crisp and all the details are essentially full. Clearly this coin was lovingly placed into an old kraft envelope at around the time of mintage and was left to Mother Nature's devices for decades, slowly acquiring the original patina. A scarce date in all Mint State grades and excessively rare so fine.

PCGS 1, NGC 1. NONE ARE GRADED FINER. Neither

MS66 has ever sold in auction, the highest graded coin to sell was a PCGS MS65+ CAC that sold in August 2015 for \$42,300. We think it should realize a record price for the date. The current Collector's Universe price is \$65,000. As the only MS66 to come up for auction, if you are an advanced Peace Dollar collector, you NEED this coin for your set. It will certainly be a highlight in any collection that it ends up in.

Not a date or grade seen often in SUPERB GEM. This coin has everything going for it and then some!

Even using a strong glass, you will NO major problems of any kind, anywhere. The surfaces are velvety smooth and have a full booming luster. There are some slight die clashes and Mint made lines. They do NOT detract from the grade. The color is a moderate ORIGINAL yellow gold. There are no spots or discolorations. Miss Liberty and the details are amazingly frosty and sharply struck. The eye appeal is terrific!

PCGS 55, NGC 40, CAC 25. You just do NOT see these around. No PCGS/CAC piece has ever sold at auction. An NGC did sell in April 2014, realizing \$7,050. We are pleased to own and offer this wonderful piece! This is a great piece to any GEM gold dollar or Type set.

A coin that is VERY RARE any finer, making attractive AU58s like the presently offered coin all the more desirable.

Rich orange-yellow gold and lustrous surfaces are nicely preserved, displaying only a few tiny lines and hints of friction. For a date that is notoriously weak in strike, especially on the hair details, the presently offered example has a great strike with extra bold definition. Only 6,583 were struck and most went into circulation; noted experts Akers, Winter, Garrett and Guth, all say this is a very rare issue in Mint State. This puts a lot of demand on pleasing AUs, especially on CHOICE AU58s.

PCGS 24, NGC 53. The population figures no doubt include duplicate and triplicate submissions of the same coin in hopes of a Mint State grade. Going back to 1994, our auction database traces 18 NGC-graded AU58s, an average of less than once per year! The most recent example realized \$3,643 in a September 2017 auction and the current Collector's Universe value is \$5,250. Most Mint State survivors are clustered in the MS61 to MS62 range. This coin has a lot to offer, and this is an important opportunity for the Dahlonega mint specialist or advanced collector of gold dollars; do not let it pass you by!

A very scarce Dahlonega mint gold dollar with a mintage of 3,533. Noted gold scholars David Akers and Doug Winter have both written that it is one of the most underrated dates in the series. This date is mostly seen in VF and EF grades and is **VERY RARE** in AU58; **EXTREMELY RARE** in Mint State.

This coin features a distinctive, flashy, semi reflective luster. Well struck for the issue, as this date is often found with a below average strike. Close examination with a strong glass does reveal a few stray lines here and there, but none that are singularly distracting. The color is wonderful and very pleasing.

PCGS 22, NGC 34. This coin last sold in 2012 for \$6,463. There are fewer than a dozen and a half examples are graded finer. The current PCGS Value is listed at \$7,350. The most recent example to sell in auction was an NGC coin that brought \$6,600 in September 2017. A PCGS graded Mint State coin would cost five figures, if you can find one (there hasn't been one sold in auction in **TEN YEARS!**). Among the **VERY FINEST** graded for this low mintage date, and a stunning **SUPERB GEM!**

Bold cartwheel luster rolls along satiny fields and across lovely, frosty devices. Semi-reflective accents flash in the protected areas of the devices that bring out a subtle reddish-coppery tone. The strike is exceptionally well struck with all of Ms. Liberty's hair and headdress details fully rendered and the definition of the wreath crisply struck up with exacting precision. The surfaces are clean and free of any distractions. All of these traits combine for a **SUPERB** and exceptionally eye appealing jewel. Only 7,500 examples were struck and this one is among the highest graded handful that survive!

PCGS 31, NGC 16, CAC 13. **ONLY THREE COINS** have graded MS67+ and there are a mere two finer. No MS67+ has **EVER** sold in auction. The last regular PCGS MS67 CAC sold for \$3,173 in the 2016 FUN auction, and before that, one sold in February 2014 for \$4,700. The last time a PCGS/CAC MS68 sold in auction, in the 2015 ANA auction, realized \$35,250. This **SUPERB GEM** is certainly worth somewhere between those two levels, and the current Collector's Universe value of \$5,000 just seems **WAY** too low. This is a great coin for anyone collecting this series, and it would not come as a shock if it ended up coming close to the five-figure area.

LOT 262

G\$1 1860 PCGS PR65+ CAM CAC

What a great looking GEM! Deep, golden mirrors beam from all over with superb clear reflection. Sharply struck and highly frosted throughout the devices. Some minor, mint made planchet flakes are noted, as are a few microscopic lint marks. A couple of teeny ticks on Liberty's portrait are noted for full disclosure, but really do not detract from the superb overall eye appeal.

The mint records show that 154 Proof gold dollars were struck in 1860, although it is believed that many were not distributed at the time of mintage. PCGS CoinFacts estimate that a total of 37 examples survive today in all grades and designations with 11 in 65 or finer grades. Jeff Garrett and Ron Guth observed when they penned their Encyclopedia of U.S. Gold Coins, that a very similar number of 1859 Proof gold dollars (mintage 80) sold in the period of time as the 1860, suggesting similar numbers of survivors. This is a very cool date for collectors to think about including in a Proof Gold Type Set; consider that all the mintages of gold dollars prior were unrecorded until 1859 and no doubt well under 50. During the Civil War, mintages again dropped to double digits and did not recover until the 1880s. This date is not one of the lower mintage rarities, nor is it one of the ultra common late dates.

PCGS 3, NGC 4, CAC 4. This is the SOLE PR65+ CAM at PCGS, and in the designation, there are a mere two coins finer, both PR66 CAM. There has not been a PCGS PR65 CAM with CAC approval ever sold in auction, nor has a PCGS PR66 CAM ever sold in auction. Any record for a PR66 in any designation is several years old, but a PCGS PR66 CAC (no longer on the PCGS Pop Report) sold in 2012 for \$27,600. With this coin's bold Cameo contrast, that level should be met or exceeded. Destined for a great collection!

To start, the fields are very deeply mirrored and the reflection off the gorgeous orange peel surfaces do beam from all over. Rich unmolested orange-gold color is the epitome of originality. Ms. Liberty and the eagle are both fully frosted, and boast full, crisply struck devices that provide awesome contrast against the deeper mirrored fields. Under a strong glass we note ZERO post mintage defects, only a single mint made lint mark on the reverse.

The undisputed KEY date to the 15-piece Indian Head quarter eagle set, with an original mintage of only 55,680. This is a decent, truly Mint State coin that borders on the CHOICE category. Fully struck and displaying a frosty mint brilliance on both sides that brings out the warm-honey gold coloration. Limiting the grade are a couple of ancient lines on the reverse, but the overall naked eye appeal is that of a higher grade.

PCGS 526, NGC 924. There is no doubt duplication in the pop reports, as the price jumps in 63, giving a good financial motivation to try and get coins regraded a few times. That said, the most recent PCGS MS62 without CAC sold for \$7,638 in July 2017, and in June a non-CAC NGC coin sold for over \$11,000! A glowing satiny mint frost shows off its original brilliance giving life to the rich gold surfaces. Struck with a precision that is not often seen on this issue, all of Liberty's hair detail and all the eagle's breast feathers are fully separated. In the old days before 3rd party grading this coin would have been called a full GEM---the surfaces are that clean, and free of any serious evidence of contact with other coins. Carefully and lovingly cared for since the day it came off the press during Thomas Jefferson's first term as President. A great example of Robert Scot's classic design.

BD-6, which is a scarce R-4+ die variety. 1807 was a transitional year at the mint with half eagles and half dollars switching from Robert Scot's Capped Bust Right design to John Reich's Capped Bust Left design. Many collectors enjoy building sets of such transitional years, and this coin pairs nicely with the following lot. A generally decent early \$5 with only light friction on the surfaces, visually appearing as light lines in the flashy fields.

Well struck, with nice definition to the details, we note some minor circulation marks, including a narrow scratch in the field in front of the portrait and a small mark on the eagle's shield. Only 80-100 examples are thought to survive per the Bass-Danreuther reference on early gold, and BD-6 is easily recognized by the boldly recut 1 and 0 in the date.

PCGS 19, NGC 12. A BD-6 in NGC AU53 sold for \$9,988 in October 2012, and that was the most recent example of BD-6 in AU53 to sell. A similarly scarce BD-1 in PCGS AU53 sold in the 2016 ANA auction for \$9,400 and the current PCGS Price Guide value is listed at \$11,000.

\$5 1834 CLASSIC, PLAIN 4. PCGS MS64 CAC

A glorious essentially GEM Classic Head \$5. What a rare delight to be able to offer a stone bold original example of this type that usually does not come with any sort of eye appeal or in high grade. This coin has both! Brilliant golden orange coloration is enlivened by a bold original mint bloom. The devices are very well struck, showing full definition in Ms. Liberty's hairlines and in the details of the eagle's wing feathers. Aside from a stray line or two that you do need a strong loupe to see, there is nothing to mar the surfaces or distract the eye.

The Classic Head series is a transitional type. The old tenor types (struck prior to 1834) by this point contained more value in precious metal than was stamped on the coin leading many of these coins to be exported and melted for the specie. An act of Congress, passed in 1834 changed that--reducing the weight to prevent the export. It was a short series, lasting only until 1839 when Christian Gobrecht's Coronet or Liberty Head series was introduced. It is a completable set, no one date is extremely rare (although some are condition rarities), and with patience can be completed--the challenge is to find coins that match this near-GEM's stunning originality and high end eye appeal.

PCGS 36, NGC 43, CAC 12. These do not appear in auction with any frequency; prior to this one selling, the last PCGS MS64 CAC to sell in auction was back in October 2011, where one sold for \$25,300. Even without CAC approval, the last PCGS coin sold in April 2013 for \$21,150. Only 10 coins are graded finer, and in MS65 and MS66, these are valued close to or over \$100,000. This gorgeous MS64 presents any collector a great value! Good luck!

An exceptional GEM Classic Head \$5, and a coin that is among the **FINEST** graded not just for the date, but the type!

A very eye appealing example of William Kneass's short lived design. A bold cartwheel luster rolls over satiny textured fields and razor sharp struck devices. Close inspection does reveal a few tiny breaks in the frost and minor contact, but you do need a loupe to see these. By the time this coin was struck, the obverse die had shattered, with a bisecting crack that comes up from the lower obverse rim between the 8 and 3 and intersects another from the rim at star 3 that goes across the nose to the hair curls above the eye, crossing the **E** in **LIBERTY** and extending to the rim at 1:00.

PCGS 2, NGC 1. For the **TYPE**, NGC has graded 10 coins as MS65, with a mere 4 finer. The most recent NGC MS65 of **ANY** date to sell (keep in mind this coin has never sold in any auction) was a much more common 1834 (pop 7) in March 2013, where it realized \$44,000. A non-CAC PCGS graded coin sold in April 2015 for \$67,563. A great coin for a GEM gold type set or for an advanced collection of this often overlooked "transitional" series.

LOT 276

\$5 1844 PCGS MS62 CAC

Despite a healthy mintage, the 1844 \$5 is quite scarce in most grades, and RARE in Mint State. This coin is very pleasing with a frosty satin luster that shows off against the well struck devices. Pleasing color in shades of olive-gold is refreshing in that it is not the typical bright yellow of conserved, dipped gold.

PCGS 11, NGC 10, CAC 4. The last PCGS coin to sell in auction was in October 2015, where one sold for \$3,525, and before that an NGC coin sold for \$3,966 in February 2014. NO CAC approved MS62 has ever sold in auction. The current PCGS price is \$4,150, and keep in mind that the next grade up will run around \$9,000. A surprisingly rare early Lib \$5 that is well suited for any gold type set or date run.

LOT 277

\$5 1854 D LARGE D. PCGS AU58

A great Dahlonega half eagle for the collector who wants to represent the mint. A borderline Mint State coin with a satiny mint frost that has a great pale orange-rich golden glow. Well struck, particularly on the reverse, this coin has a great look overall and the eye appeal is excellent.

PCGS 42, NGC 65. Going back to August 1995, our database shows only 14 PCGS examples sold in auction. That goes to show you that you cannot always use the Population reports to judge rarity. Generally selling in the \$5,000 to \$6,000 range since 1999, the current PCGS Price Guide value is listed at \$6,500. If you are looking for a nice "D" mint half eagle, be sure to bid on this one!

PCGS# 8219 | EST: \$3,300+

LOT 278

\$5 1858-C PCGS AU58

One of the more "common" issues for the Charlotte mint, it is still decidedly RARE in Mint State, and very scarce in AU58. It also, luckily for collectors, is one of the better produced dates, thus a great coin for type collectors, as well as southern branch mint specialists.

Ample golden luster blooms in the fields surrounding the well struck devices. The surfaces are a very pleasing medium gold color with some hints of flash in the obverse peripheral details. Only the slightest hint of friction keeps this coin out of a Mint State holder.

PCGS 19, NGC 34. Don't let the population data fool you, according to our Auction Database, only 8 AU58s graded by PCGS have sold in auction going back to 1999, including the DiBello-Bass coin that sold for \$9,200 in 2000. More recently an example sold for \$7,638 in September 2016. The current Collector's Universe value is \$6,250 and we think a coin like this will certainly see very stiff bidding competition!

PCGS# 8277 | EST: \$5,000+

LOT 279

\$5 1891-CC PCGS AU58 CAC

A very attractive example of this popular CC mint issue. The 91-CC has one of the higher mintages of the series, and as such, collectors looking to own an example from each mint often select this date. Just a hint of friction on the high points and in the fields keep this highly lustrous coin from a Mint State grade. The surfaces are totally original.

PCGS 289, NGC 491, CAC 39. NO PCGS/CAC coins have ever sold in auction. The current PCGS Price Guide value is \$1,550 and we think this coin could surpass that level easily.

\$5 1905 PCGS MS67+ CAC

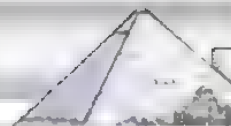

The **SOLE FINEST GRADED** example of this date at PCGS!

This is a scarce issue in MS65, and rare finer, extremely so in such a lofty grade.

Frosty, satin luster glows on both sides of this sharply struck, **SUPERB GEM**. Virtually perfect surfaces show only a couple of microscopic ticks that you really need a powerful loupe to locate. The surfaces show a very pleasing, totally original look.

PCGS 3, NGC 6, CAC 3. This is the **ONLY MS67+** graded at PCGS and the **TOP OF THE POP!** This is **NOT** the NGC coin that sold in April 2017. As a comparable APR, we sold an 1897-S in the same grade in our December 2017 Regency Auction for \$38,775. Worthy of the finest of cabinets and we do expect strong bidding for this magnificent **GEM**. Good luck!

What a glorious near miss GEM! We can't stress enough how nice of a coin this is.

Extra nice surfaces are way above average. They are smooth and overall pretty clean. Even the dreaded right reverse field has just a few tiny ticks. A strong luster nicely shows off the original gold color. There are NO spots or discolorations on any high points. Miss Liberty and all of the details are frosty and are very well struck. The eye appeal is beautiful!

PCGS 47, NGC 11, CAC 8. The last PCGS CAC piece to sell in auction brought \$16,450 in October 2016. Do not let the pops fool you, these are difficult coins to find fresh looking and high end like this piece!

\$10 1797 LARGE EAGLE. PCGS AU55

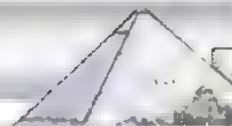

We love early \$10s--there really is something very impressive about these large size gold coins from the early days of the American republic.

BD-2, R-4+--noted for the Long Thin Neck on the Eagle, with an estimated 80-100 examples thought to survive in all grades.

This coin has a very pleasing honey-orange gold coloration is brought out by the satiny frost in the fields. A wealth of detail remains in the devices and the fields show just some minor lines and ticks noted with a strong glass. Overall, the naked eye appeal is strong and this early \$10 will fit in nicely with any set of early gold.

PCGS 37, NGC 25. There has not been one sold in over three years, that coin, which did not have as much eye appeal as the presently offered coin, and realized \$30,550. The current PCGS value is listed at \$36,500. With so many of these early gold coins having been harshly cleaned or worse, this lovely coin should delight any serious collector.

A very stunning and impressive, SUPERB GEM that is tied with one other for second finest graded, bested only by a single, monster MS68+.

Looking at the surface quality and luster you might mistake this coin for the ubiquitous 1901 S, but it is a lovely GEM of this conditionally rare issue. Strong radial mint luster beams on clean, problem free surfaces. The details are likewise very well formed and the eye appeal is superb and totally original.

PCGS 10, NGC 10, CAC 4. PCGS has graded exactly 2 coins MS66+ and NGC only 1. The other example sold for \$12,925 two years ago, and the current CU value is \$16,000. \$10 1908-D NO MOTTO. PCGS MS64 CAC

A VERY high-end coin. It's a myth this date comes nice.

Superior surfaces are pretty clean and smooth. The texture is a thick satiny type. Only when using a strong glass will you find alight frost break on the obverse and a few scattered tiny ticks on the reverse. Nothing is visible to the naked eye. A strong glowing luster fires up the original colors on both sides. Deeper shades of orange gold glow all over. There are NO spots or discolorations. Miss Liberty and every detail are sharply struck and do stand out. The eye appeal is neat!

PCGS 56, NGC 30, CAC 10. The last PCGS MS64 CAC one to sell in auction brought \$21,150 in February 2014. Do not let the populations fool you. These are tough coins! PCGS 3, NGC 10. The most recent example to sell in auction realized \$28,200 in August 2013. Other NGC coins have sold for as much as \$40,250 in the last decade. This is a nice coin for any high grade set of \$10 Indians. \$10 1926 PCGS MS66 CAC

An exceptional and boldly eye appealing GEM survivor. While readily available in all grades up to MS65, the 1926 is RARE in MS66 and there are none finer than MS66+.

The presently offered coin has a strong frosty mint brilliance that shows off the wonderful medium gold coloration. The surfaces are very nice, superior to so many we see. A close inspection with a powerful glass reveals a few trifling marks, but none of these are in the focal areas and are easily overlooked in light of the SUPERB eye appeal.

PCGS 19, NGC 50, CAC 6. The last one to sell was the Duckor-Crow River coin we sold in our October 2017 Regency auction for \$22,913. This coin should see similar bidding! A great coin for any SUPERB gold type set or collection of Indian Head \$10s.

EX S.S. CENTRAL AMERICA**

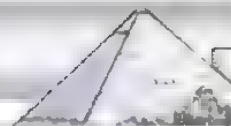

SSCA 14A BROKEN A, FULL E. Housed in the original gold foil PCGS holder. This coin is stunning, especially considering the 130 years it sat at the bottom of the ocean. A bold, swirling cartwheel luster brings out the seductive, rich orange gold color.

Both sides are sharply struck and show full definition to the devices. Only a small number of the tiniest bag marks are noted for full disclosure, but none are distracting to the unaided eye. The eye appeal is amazing, more so when you remember that its graded "only" MS63.

PCGS 6, NGC 0, CAC 3. This is the only one that has sold recently, bringing \$35,250 in the 2017 FUN auction. The collector who bought it has changed directions and has now placed this, and the following two lots in our sale. For the variety, there are only 3 finer, none of which have ever sold in auction.

Variety 17O, No Serif, Left S. S.C.A #7919. Housed in the original Gold Foil PCGS holder.

While generally available in circulated grades, thanks to a generous mintage of nearly 1.2 million pieces, prior to the discovery of the S.S. Central America wreck, they were quite elusive in Mint State. The shipwreck contained over 1,000 survivors, most in Mint grades.

The presently offered coin is essentially of GEM quality. A blinding and glowing mint frost gleams in the light, glowing around the sharply struck devices. A gorgeous two-tone golden coloration adds to the already stunning visual allure.

PCGS 16, NGC 0, CAC 5. This is the only CAC approved example in MS64 to sell, realizing \$28,200 in the 2017 FUN auction, and was the first to sell since April 2009, so do not let the pops fool you! What a great Type 1 Twenty with a great provenance!

SSCA 20A SPIKED SHIELD. Housed in the original gold foil tag holder, and comes with the original box and papers as originally marketed.

Stunning radiant mint brilliance shines on both sides of well struck and beautifully preserved GEM that borders on the SUPERB category. When you consider that this coin sat for well over a century at the bottom of the ocean, its preservation is even more remarkable. The surfaces are incredibly smooth devoid of all but the most insignificant tiny tick or two. It was thanks to the S.S. Central America shipwreck that any Type 1 double eagles exist in GEM grades. Historically important, the loss of the gold cargo exacerbated the financial Panic of 1857, which was one of the economic factors that led to the sectarian differences that led to the Civil War.

PCGS 136, NGC 0, CAC 36. Only 4 CAC-approved examples have sold in auction since 2012, all selling in the \$30,000-\$35,000 and the current Collector's Universe value is listed at \$35,000. Type One \$20s are among the most popular series of gold coins to collect, they are big, heavy, historic, and of course gold. Nice sliders like this are very few and far between.

PCGS 52, NGC 140, CAC 19. The most recent PCGS/CAC coin to sell in auction realized \$7,050 in March 2016. While the 56-S and 57-S are common because of the S.S. Central America wreck, no hoards of 58 S have ever come out. Working on a set? Add this one today.

Essentially a fully CHOICE example of this Type 2 \$20. Sharply struck with Ms. Liberty and all the details crisply struck and nicely frosted, there is a bold luster with full cartwheels on the reverse. For the grade the surfaces are quite clean, free of any singularly distracting marks.

PCGS 363, NGC 249, CAC 41. PCGS has graded 15 coins in 62+, and the only one to sell realized \$4,406 back in a September 2014 auction. The CU value of \$3,500 seems cheap, especially for a coin with such great eye appeal!

LOT 293

\$20 1885 S PCGS MS63+ CAC

A very pleasing, fully choice example of this date. Frosty mint brilliance takes on a wonderful satin sheen on the obverse, while the reverse has some real hints of reflectivity in the fields. Sharply struck devices are fully defined. The surfaces are quite pleasing, showing only a minimum of marks, none of which are singularly distracting.

PCGS 423, NGC 126, CAC 14. PCGS has graded 13 in 63+.

The CAC population figure certainly shows how this date comes, even graded MS63. The date is quite rare any finer, and so we also believe the PCGS and NGC data are inflated due to resubmissions. The current Collector's Universe value is listed at \$4,650 and only one PCGS MS63+ CAC has ever sold in auction, realizing \$5,175 in the 2012 FUN auction. We think this coin will see very strong bidding when it crosses the block and will delight any gold bug!

\$20 1890-CC PCGS AU55

Bright, brilliant gold surfaces show a wealth of satiny luster throughout the fields. The definition of the details is quite bold with only the lightest hint of friction on the high points. Some ancient light lines are seen in the fields but really do not detract from this coin's nice look. It is one of the more common CC-mint double eagles, but always popular because it was struck there.

PCGS 294, NGC 437. The most recent one to sell realized \$4,935 in the recent 2017 ANA auction which is about the average price for PCGS AU55 examples sold in auction. The current PCGS Price Guide value is listed at \$6,000. The 1890-CC is a great representative for the mint in a set of double eagles featuring one per mint, and this one is very nice.

\$20 1891-S PCGS MS64+ CAC

What a marvelous GEM! Bested by only a single MS65, this coin is tied for second finest at PCGS. Exceptionally lustrous, with a thick glowing satin mint frost, this beauty has silky smooth surfaces, devoid of all but a few teeny ticks, none of which can be seen without the aid of a glass. The eye appeal is that of a full GEM, if this was a more common issue like a 1900 or 1904, this coin would have likely graded a full MS65.

PCGS 120, NGC 62, CAC 15. There are THREE examples in MS64+ and NONE have ever sold in auction. We estimate it would bring well over \$20,000 if sold. The sole finest, a PCGS MS65 has also never sold in auction. Regular MS64s, graded by PCGS and approved by CAC have sold for as much as \$6,900 and there is a record for a non-CAC selling in June 2014 for \$12,925. With this coin's ultra high end look, we would not be surprised if the current Collector's Universe price of \$7,500 was exceeded! Good luck!

\$20 1920 PCGS MS65

Legend Rare Coin Auctions is honored to present this GEM 1920 Saint, one of the absolute highlights of this sale.

Our sister company Legend Numismatics has assembled the top TWO (one is not registered) all PCGS Saint sets. They have looked at every great Saint there is. TWICE they passed on the other MS65. It is their opinion, that not only is this coin the real deal as an MS65, it is FINEST graded. Yes, this coin has been to CAC (they called it a C). Of the 228,000 minted, PCGS has found only 2 GEM MS65s after 35+ years of operations. That says a lot how this date comes.

To start, we know this coin came out of an NGC MS65+ holder. So you have TWO major services who fully agree it is a full MS65.

The surfaces are very clean and smooth. Only with a strong glass can you find a few thin and light Mint grease lines not problems. The originality of this coin is as bold as you will ever see. A strong luster (for a 1920) does beam from all over. The color is totally original and is a beautiful pale gold/pale greenish go.d. There are NO copper spots. Miss Liberty and every detail are well struck and have delicate frost. The eye appeal is really nice!

PCGS 2, NGC 7. The other piece sold for \$86,250 in the January 2012 FUN sale (6 LONG years ago). Legend Numismatics could not get itself to buy that coin-even though we felt the coin sold too cheap. This coin is far different. You can't imagine this coin in anything less than an MS65 holder.

We strongly suggest you check this piece out in person to confirm everything we are saying. We fully expect strong bidding and a record price to be set. Good luck!

Our sister company Legend Numismatics told us they have only seen one other true GEM matched Original set in the past few years. Most sets are put together.

While this is not a wild colored set, it is a very pleasing pretty set. The quality is definitely superior. All of the coins' surfaces are silky smooth and are super clean. The luster is surprisingly strong and shows off a light pearl/champagne/pale gold color. All of the details are exceptionally struck. The eye appeal is excellent!

Only 2,100 sets were ever been minted. MS66+ seems to be the grade that gives you the "best bang for the buck." The Philadelphia mint coin is excessively rare any finer, in fact only 2 sets in 67 can be put together! Here are the pops: P Mint: PCGS 73 (11 in 66+), NGC 28 (1 in 66+), CAC 25. D Mint: PCGS 121 (15 in 66+), NGC 36 (2 in 66+), CAC 37. S Mint: PCGS 119 (10 in 66+), NGC 59 (4 in 66+), CAC 41. There are no numbers for sets, but the total combined PCGS Price Guide value is \$5,500— but keep in mind, if you were to put a set together it would likely NOT have the cache of being an original PDS set. LOT 308

50C 1925-S CALIFORNIA. PCGS MS66+ CAC

Among the classic commemoratives, the California Diamond Jubilee has one of the more endearing designs, with a prospector of 1849 panning for gold on the obverse and a California Grizzly bear on the reverse, the symbol on the state flag. Usually not seen in such fine grades, the presently offered coin has a bold visual appeal with a glowing mint bloom and dappled golden-russet patina on both sides that accents the sharply struck devices and smooth surfaces.

PCGS 448, NGC 426, CAC 148. There are only 28 graded MS66+ and is very scarce any finer, the most recent PCGS/CAC coin sold for \$1,058 in February 2017, and the current PCGS price is \$1,100. A great looking coin that should see spirited bidding when it crosses the block. Good luck!

PCGS# 9281 | EST: \$1,000+

LOT 309

50C 1936 CLEVELAND. PCGS MS66+ CAC

As noted on the PCGS insert, this was the 134th Cleveland struck and it was carefully saved since then. Silky smooth surfaces have a pearly-satin like luster and patina on the obverse, while the reverse is bathed in a wealth of deep autumnal toning, sporting shades of aubergine, amber, and olive. The eye appeal is quite nice, and is suggestive of a higher grade.

PCGS 429, NGC 516, CAC 187. There are 31 graded MS66+ and then the population drops to 70 in MS67. What makes this coin special though is that it is among the first examples to come off the dies. Worthy of an advanced set.

PCGS# 9288 | EST: \$3,000+

LOT 310

**50C 1892 COLUMBIAN. PCGS MS65 CAC
FROM THE EDMUND FAMILY TRUST**

Simply GORGEOUS! This coin was stored for years in an old album or other cardboard holder that imparted a very bold rainbow around the obverse rim and deeper rainbow patination on the reverse. The obverse is especially lovely with a brilliant luster that brings out the beautiful colors. A superb looking coin for the assigned grade.

PCGS 796, NGC 844, CAC 132. This impressive GEM is certainly worthy of a very strong bid. As the first in the series of classic commemoratives, if you are looking to start a set, this GEM, with its impressive, high end look would be a great way to start on a set

Flashy and semi-PL fields have a bold luster that brings out the outstanding rainbow toning at the rims on both sides suggestive of long term storage in an old album. What a great looking coin!

PCGS 216, NGC 152, CAC 103. The current PCGS Price Guide value is \$675 and similar examples have sold for more. A beautiful SUPERB GEM worthy of a strong bid!

LOT 312

**50C 1936 DELAWARE. STRUCK
THRU REVERSE. PCGS MS64
FROM THE EDMUND FAMILY TRUST.**

Lustrous and untuned, the noteworthy trait of this Delaware Tercentenary half dollar is the nearly one inch valley that was left in the reverse starting next to the right of 1638 and crossing diagonally through the ship to the lower right sail when some type of debris fell between the die and the planchet. The size and depth of the area is quite impressive and errors on early commemoratives are quite scarce and not often encountered. A very cool conversation piece.

PCGS# 9301 | EST: \$350+

LOT 313

**50C 1936 GETTYSBURG PCGS MS66 CAC
FROM THE EDMUND FAMILY TRUST.**

A gorgeously and deeply toned Gettysburg! Varied shades of reddish-orange, gold, olive, and rich eggplant purple dominate the reverse, leaving the central devices a brilliant silver. The obverse is a touch more iridescent with additional accents of aqua that is brought out in certain angles. The eye appeal is exceptional for the grade, and if resubmitted it would not shock us if it at least got a + (we do not guarantee that it will).

PCGS 797, NGC 338, CAC 175. As part of the Civil War themed sub-set of classic commemoratives, the Gettysburg is ALWAYS sought after, especially in such a high grade. The last two examples to sell realized \$900 and \$1,560 in a November 2017 auction, but the presently offered GEM is much more eye appealing! The Collector's Universe value is listed at \$1,200--and that level may even be challenged when the gavel drops on this one!

PCGS# 9305 | EST: \$900+

LOT 315

50C 1935 HUDSON. PCGS MS66 CAC

A rich satin luster bursts from under a very light layer of iridescent, pearly toning. Depending on the angle the light hits this coin variegated hues come out imparting a great look. For the grade this coin is remarkably clean and free of any distracting marks.

PCGS 311, NGC 164, CAC 109. The most recent PCGS-graded coin sold for \$1,380 and was NOT CAC in November 2017. The presently offered example has a much more even look and should command a good bid. The CU value is \$1,400.

PCGS# 9312 | EST: \$1,150+

LOT 314

50C 1936 GETTYSBURG. PCGS MS67 CAC

The way a Gettysburg should look! Awesome amber-orange-red-gold toning dominates the highly lustrous obverse, while the reverse has a deep band of aubergine at the right rim, that lightens to a brilliant silver center, with just a touch of coppery toning at the extreme center, evidence of LONG term storage in the original cardboard holder of issue. As expected for such a lofty grade, the surfaces are pristine and even using a strong glass we are unable to identify even the slightest stray mark.

PCGS 120, NGC 61, CAC 44. Only 12 are graded MS67+ and a mere 3 are tied as FINEST at MS68 (good luck finding one!) This one is more appealing than any of the records of PCGS/CAC examples sold at auction going back to 2014--which is why in our September 2016 Regency Auction this coin realized a strong \$3,408! Today it is certainly worthy of a premium bid and placement in a top notch set of classic commems!

LOT 316

50C 1935 HUDSON. PCGS MS66+ CAC

Pearly, satin like frost has just the slightest hint of color at the rims. Very few marks are noted and only visible with a strong glass. A nice example.

PCGS 311, NGC 164, CAC 109. 28 examples have been graded as MS66+ at PCGS, 8 at NGC. This coin most recently sold in September 2016 for \$1,880. It is a true PQ example and bordering on a full SUPERB grade. Note that fewer than 2 dozen coins have graded finer at PCGS. Certainly a coin bound for a GEM set of commems.

LOT 317

50C 1925 LEXINGTON. PCGS MS65 CAC

FROM THE EDMUND FAMILY TRUST. Totally original and satiny, this Lexington is well struck, and pleasing with only a single small mark that we note for full disclosure. The toning suggests, perhaps, long term storage in the little wooden box that some were distributed in.

PCGS 1141, NGC 888, CAC 187. According to our database the last PCGS/CAC coin to sell in a major auction brought \$353 in a June 2014 auction and the current CU value is \$325

LOT 318

**50C 1938 NEW ROCHELLE. PCGS MS67 CAC
FROM THE EDMUND FAMILY TRUST.**

Distinctive flashy, watery reflective luster very similar to the coins that the grading services call Specimens, but this coin was graded before PCGS began assigning that designation. It certainly looks a lot like the Specimen examples we have sold recently. Strong evidence of die polishing within the broadly mirrored fields suggest that this may be one of the 50 Specimens struck, or at the very least struck soon after that run, where the dies still had a good amount of the original polish. Subtle pale gold tone frames the rims on both sides, a touch richer on the reverse. Whether or not it is a Specimen, the eye appeal is SUPERB and very high end.

PCGS 202, NGC 106, CAC 103. According to our auction database, no PCGS/CAC MS67s have sold in auction since December 2015. A Specimen-67 is clearly a low five figure item, just taking a look at the APRs. We have assigned a value somewhere in the middle, allowing the bidder to determine its status. In MS67 the CU value is \$1,250, in SP67 it is \$17,000. Whether or not it is a Specimen, it is very attractive and worthy of a premium bid!

PCGS# 9335 | EST: \$3,000+

LOT 319

50C 1938 NEW ROCHELLE. PCGS SP67 CAC

Brilliantly flashy silver surfaces shine blindingly all over! As expected for the 67 grade level, this coin has no hairlines, ticks, marks or carbon spotting. The strike is full and the fields are fully reflective, boldly prooflike and display rich mirrors. The eye appeal is superb! A very rare variant to the New Rochelle half dollar. During the production run, mint employees struck 50 examples on polished planchets after polishing the dies. What keeps them from being full PROOFS, is that each coin was struck only once, rather than two or more times as required for striking proofs.

PCGS 7, NGC 4, CAC 9. Only 2 are graded SP67+ and there is only one SP68 finer. We sold a PCGS SP67 without CAC sticker in our September 2016 Regency Auction for \$17,625. Since then, they have brought between \$12,000 and \$13,000. The current PCGS Price Guide value is listed at \$17,000. While overall, the classic commemorative market has shown softness in the last few years, Specimen and Proof strikings have done well and are interesting pieces for the advanced, specialist collectors.

A truly superb example of this always popular type. Pulchritudinous in every respect from the fully struck up devices, iridescent pastel pink, gold, and green tones, and brilliant satiny mint frost. Both sides are virtually perfect, and the eye appeal is very high end.

PCGS 132, NGC 101, CAC 42. PCGS has only graded 19 coins as MS67+ and there are five reported finer. Only two CAC coins have sold in auction, and neither displayed this coin's lovely iridescence. The current PCGS Price Guide value is \$2,950 and keep in mind that a 68 will cost in excess of \$10,000. Destined for a fine collection of these early commems!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

\$20 (1857) J A 1857 5. REV. HUB TRIAL. PCGS MS62BN

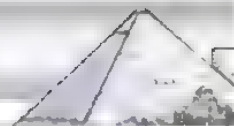

Extremely RARE, perhaps only one of two known examples, and this one is clearly finer than the Judd and Pollock plates. The surfaces are a pleasing, even brown with some light olive and gold accents.

The incuse impression of a heraldic eagle, shield on breast, arrows and olive branch in talons, and ribbon in the beak. The hub impression makes a mirror image of what the design would actually look like. While undated, Judd and Don Taxay tentatively declared that these were struck in 1857, as the eagle style, though different shares some characteristics with an eagle that Anthony Paquet utilized on some 1858 half dollar patterns.

PCGS 1, NGC 0. There is at least one other example known, the Judd/Pollock/Taxay plate coin. This coin has no prior pedigree other than it is ex 2011 ANA auction and 2016 FUN auction.

In 2011 it realized \$9,200. This is a VERY RARE and under appreciated piece of numismatic Americana and certainly a piece that invites further study.

\$20 (1859) J-A1859-10 DIE TRIAL. PCGS MS64

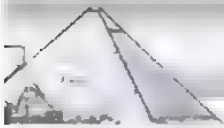

Presented here is an essentially UNIQUE die trial of an undated (1859) double eagle obverse die, struck in a white metal planchet without a collar. Remnants of the original paper backing remains on the otherwise blank reverse.

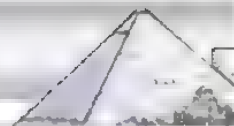

Very pleasing, remarkably well preserved for such a thin piece of soft metal. There are no stray scuffs or serious marks or even any lines that can be seen. Well struck with all details nicely embossed.

PCGS 1, NGC 0. This coin is absolutely UNIQUE in private hands! The Judd Plate coin, this coin's provenance is: ex Empire Coin Co Mail Bid Sale #1, November 1958, lot 103; Stack's sale of the Herbert Oeschner Collection, September 1988, lot 246; Superior's Session of Auction '89, lot 943; Boyd E. Hayward Collection (Bowers and Merena), September 1997, lot 1553; Stack's Bowers 2014 ANA Auction, lot 12393; and most recently 2016 FUN auction, lot 6322, where it sold for \$19,975. The other two examples known to exist are both impounded in the Library Company of Philadelphia, and will not be on the market anytime soon. This is a very important opportunity for the advanced pattern collector who collects the more esoteric items listed in the Judd Appendix.

\$1 1836 J-65. RESTRIKE PCGS PR64+ CAC

Likely struck in the 1850s, the J-65 features Christian Gobrecht's Seated Liberty figure without stars with C. Gobrecht F. on the stone base. The flying eagle reverse is without stars and the eagle flies even. Struck in Die Alignment III on a Silver planchet with a plain edge. The J-65 is Extremely Rare, rated a full R-8 with five known in all grades.

The presently offered GEM has a great, totally original look. Sold in the March 2017 sale of the Blue Moon Collection, it was described as:

"Magnificent and multicolored, this example ranks among the finest survivors of this rare variety. It combines extraordinary quality with extraordinary rarity. A sunset prism of color surrounds the obverse device, contrasting with mottled deeper gray and pale lilac on the reflective fields. The reverse is a subtler and more even blend of pastel violet and gold. Both sides are very sharply struck and exhibit excellent visual appeal. A long but densely curled lintmark gathers between Liberty's knee and bent elbow, only the most notable of several significant lintmarks scattered over the obverse. The present hairlines are minor, and no major marks are seen.

A substantial area of raised die rust is noted in front of Liberty's face. This example also shows a very crisp low spot, caused by a struck-through remnant on the die, below the right side of F of OF. The DTS die state nomenclature has been pegged to this exact specimen, identifying this coin as the definitive Die State A with strong low spot. Later strikes show this depression diminished.

"The starless reverse employed on this reverse was first used in 1838; this variety was not coined until 1869 at the earliest and perhaps not until the early 1870s. Research by Saul Teichman has traced only five examples, one of which is impounded in the collection of the American Numismatic Society. The only finer specimen is currently in the Simpson Collection. This one has not been sold in nearly 25 years."

All we can add is a this coin really is a mega WOW. The Simpson coin is beautiful but this coin has far more color and flash!

Its provenance is wonderful as well having been part of the famed Reed Hawn Collection (sold October 1993) and Blue Moon.

In the Hawn catalog, they note "Very rare: we have records of only three specimens: 1952 ANA, Stack's October 1967, and the Garrett coin." The Garrett coin later appeared in the L.K. Rudolph Collection, bought by Dr. Julius Korcin (the example now in the ANS). The 1952 ANA coin is now the coin in the Simpson Collection. A PR65 sold in Goldberg's June 2004 sale, said to be off the market since the 1920s and is also now impounded in the Simpson Collection. A patch of color around the date helps plate match this to the Stack's October 1967 Charles Jay sale, where it sold as lot 172.

PCGS 1, NGC 0, CAC 1. We can NOT stress enough how rare this coin is. With the Simpson PR 65 locked up probably forever, this is the finest example that ever will be offered. The ONLY reason it is for sale-our partner Bruce Morelan was going to buy it and his interest got derailed by a little 1804 \$1! We just can't put this wonder GEM away! The last line in the October 1967 description is as valid today as it was fifty years ago, and a fitting quote here: "Of EXTREME RARITY and should attract considerable bidding"

G\$1 1836 J-70. PCGS PR65 BN CAC

This is a R-7 (4-12 minted) and is struck in copper. What a neat design that could have been. This coin is SUPERB in every respect.

Deep mirrors are surprisingly clean, crystal clear, beam from all over, and are highly reflective (unusual for any copper). When you twirl the coin, the mirrors look like a freshly made perfect sheet of glass. Both sides have deep original shades of brown/violet/purple/gold that swirl all over. Every detail is needle sharp in strike. The eye appeal is fantastic.

PCSG 1, NGC 1, CAC 1. It is critical to note, that there is only one higher-the PR66 Simpson coin. There is no pricing published for this coin. The NGC coin is not CAC and is very dull. This is really the ONLY acceptable GEM you will be able to buy for a J-70. Our sister company Legend has handled more GEM Patterns than any dealer ever, tell us this date is by far harder to find than the ones struck in gold. Usually it is the other way around. We can't stress enough what a tremendous opportunity this coin offers.

LOT 347

\$10 1863 J-350. PCGS PR63 BN

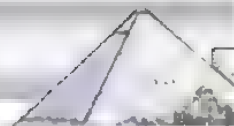

Rated R-6- with about 21-30 examples known. The obverse is the regular Liberty Head design then in use, paired with a similar reverse with a ribbon inscribed GOD OUR TRUST above the eagle. Struck in copper with a reeded edge.

Dusty olive and lilac patina graces both sides more so on the obverse than reverse (which shows some areas that do not have any patina). The uspatterns.com website notes that these are usually gilt or bronzed, and we feel the coloration is from unevenness in the bronzing finish. Well struck on both sides.

George Eckfelter noted in his journal on November 17, 1863, that "Struck 20 sets of copper 10 dollar pieces 'God is our trust.'" That refers to both variants, J-350 and J-352 (which has GOD OUR TRUST in the field without a ribbon).

PCGS 5, NGC 3. NGC's Census includes 1 in Bronzed Copper and 2 in Gilt Copper. The most recent PCGS coin last sold in a July 2008 auction, where it brought \$4,715. Today the market is a little different than it was back then--even still this is a very scarce pattern for a gold coin and the gold impression is UNIQUE and impounded in Bob Simpson's collection.

Ex Harry Bass Collection.

James Longacre's Indian Princess seated with globe, flag, holding a pole mounted with Liberty Cap is struck in seemingly high relief, paired with the reverse of regular issued proof dollars. Struck in silver with a plain edge, this pattern is listed as R-7- with 7-12 thought known.

This is one of two coins PCGS has graded in CAMEO, the only other is the slightly finer PR64+ in the Simpson Collection. Spectacular deep mirrors really explode from all over. They have remarkable clarity, cleanliness, and are loaded with flash. There are more lines on the holder of this coin than on the coin! The mirrors are better than most we've seen on regular Seated Dollar Proofs. A wicked cool looking outline of totally original reddish gold frames all the devices. Miss Liberty and every detail almost look like they were sculpted and are 3-D in appearance. The eye appeal is phenomenal!

Harry Bass purchased this coin from Kagin's "Sale of the 70's", November 1973, lot 1351. It was then offered in Bowers & Merena's May 1999 offering of the Harry Bass Collection, lot 1262. Since then it has appeared several times, in the original PCGS holder from the Bass sale, which did not designate it a CAMEO

PCGS 2, NGC 0, CAC 1. The other one is the PR64+ mentioned above that is in the Simpson Collection. This coin has a bold visual appeal and provenance that is hard to improve upon! We do love the look of this coin and it is going to find itself in a great collection of patterns or silver dollars. There is just so much to love about this one!

25C 1870 J-916. PCGS PR67 CAM CAC EX SIMPSON
R-7+ 4-6 Minted. Stuck in aluminum with a reeded edge.

What an amazing SUPERB GEM! Clearly the **FINEST** extant example of this **VERY RARE** Judd number!

Deep and watery like mirrors beam from all over. The mirrors have no oxidation. There is a small area of roughness in planchet in the obverse right field (mint made). Miss Liberty and the details are sharply struck and have thick frost.

The eye appeal is excellent!

PCGS 1, NGC 0, CAC 1. This is the **FINEST** J-916 known. In fact, overall in ANY Aluminum Pattern design there are very few PR67's. There is a \$10,000 Collector's Universe Value, but of course, **NONE** have ever sold in auction. Mr. Simpson paid \$15,000 for this coin in 2008 mega Pattern deal. Opportunity knock loud here!
